Traffic

Transurban traffic data includes all vehicle detections. Information is collected from roadside equipment and processed in back-office systems.

Trip

A trip is a single journey defined as follows:

- **Cross City Tunnel, Hills M2, Lane Cove Tunnel/Military Road E-Ramp, M1 Eastern Distributor, M5 South West Motorway:** number of vehicles passing through a designated toll point. On these assets, trips are the same as passages.
- **Westlink M7 and M4:** a trip will, in most cases, equal two passages, however sometimes a trip can represent only one passage (an 'orphan' trip).

Passage

A passage occurs when a vehicle is detected travelling under a gantry.

- **Westlink M7 and M4:** number of vehicles detected travelling under a gantry on the entry and exit of the road.
