Bright P-12 College

introduction

Welcome to the new directory **undergraduate!**

The directory **undergraduate** gives you a very easy and efficient means of identifying options which you might realistically explore and aim for.

In doing so, it will give you a great sense of possibility and opportunity.

Unless you only want to get into medicine, veterinary science or one or two other health related options, it is very likely that there is, within reach, somewhere or other, the very course you are looking for.

The directory is a simple listing of selection ranks for entry to courses in 2021.

Where **n.a.** is listed instead of a cut-off score, it means that criteria other than a simple Selection Rank are used in the selection process (or that no offers were made in 2021).

New courses to be offered in 2022 are not necessarily included in this directory.

selection ranks

The entries in the directory follow the new national protocols for reporting entry levels to university courses – the Lowest Selection Rank and the Lowest ATAR for which an offer was made. Prerequisites are also listed (See notes page 64).

The contents of this publication are presented in good faith and persons making use of it do so at their own risk. There is no express or implied warranty of liability on the authors and publisher in relation to any damages, costs or losses as a result of the publication of this book. The publication should be regarded as unofficial.

This resource was purchased by Bright P-12 College and may be photocopied for non-commercial school use.

agriculture and environment

According to Neal Menzies, President of the Australian Council of Deans of Agriculture, "Over the next 20 to 30 years food production will have to increase by 50% to meet the needs of an ever increasing world population ... agriculture will need the best educated and innovative minds involved to meet this challenge."

Furthermore, the population dynamic will be reinforced by a profound shift in demand flowing from the increasing prosperity of developing economies and a resulting shift in demand towards agriculturally more intensive products of meat and more highly processed foods.

Agriculture may well offer the opportunity of escaping the crowds in the graduate employment market and of having something distinctive to offer in an area of great significance in Australia.

built environment

The built environment specialisations – architecture, interior design, planning and landscape architecture, offer a unique combination of the visual arts, science and the humanities. They are a smart way of integrating an interest in any of those disciplines within a professional qualification.

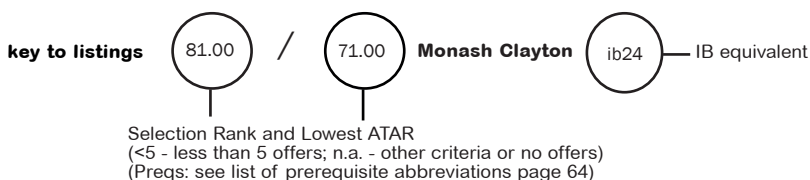

The design disciplines of architecture, landscape architecture, urban design, interior architecture and industrial design cover the whole range of the built and natural environment from the broadest aspects of urban and landscape design to the design of individual

precincts, open spaces and buildings, to the design of building interiors, right down to the smallest scale of manufactured products which are so central to people's lives.

The teaching of the design disciplines within the built

environment is primarily in a small group, studio setting in a creative atmosphere shared only with the creative and performing arts schools.

It's not quite like going to art school, but it's not like doing accounting either.

Professional recognition in architecture

The accredited professional qualification in architecture is a Master of Architecture degree. Bachelor-level degrees are not accredited.

In practice, most students undertake a designated pathway qualification at the bachelor level, leading towards a Master of Architecture.

business

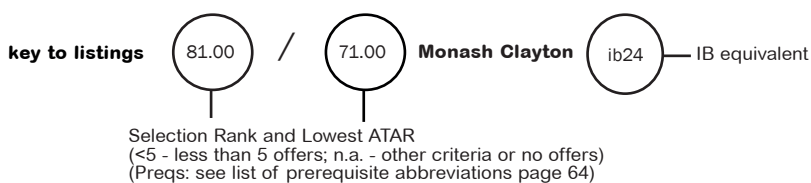

Perhaps economics? Our daily lives are entirely shaped by economics. Whether it is interest rates, housing prices, employment/unemployment, petrol prices, the Australian dollar or globalisation. If you don't understand economics, you don't know what is going on.

Economics gives you a relevance and credibility in so many of the areas of opportunity. It can take you to the most highly sought after positions of influence in Australia and internationally.

For instance, investment banking and business consulting start with an understanding of the changing economic landscape; even defence policy is underpinned by an

understanding of competing international economic interests; sport is to a large extent a national or international marketing exercise; Brexit and Chinese growth are determining our fate; the Greater Sunrise gas fields are critical to our relationship with East Timor, COVID-19 impacts and so on.

It's all economics.

There are a lot of accounting graduates these days, there are many science and international studies graduates, competing for what may be on offer - but there is a real shortage of good economics graduates (which usually means an honours degree) for whom the most prestigious employers will be competing.

These include the banks and investment banks, the Commonwealth and state treasuries, the Reserve Bank as well as the other policy areas of governments, the major international accounting and consulting firms, energy companies, international transport companies, industry bodies and PR consultancies, major property developers and so on!

areas of economics

Economics is a conceptual and analytical framework whose techniques are very broad and whose territory is extraordinary in its reach - from exploring individual behaviour, the dynamics of markets, major corporations, societies and economies as a whole (and their regulation), and their interactions internationally.

There is not much that economists don't claim as their territory.

For instance, as well as the obvious domains of business, banking and finance, and the economy overall, much of economics is applied social analysis - it could be about unemployment, international development, income support, immigration, education, transport, international relations or health. Health economics alone is a major field.

communications

One of the most important things to consider is whether or not you integrate any other specialisation within a communications degree or combine another degree with your communications degree.

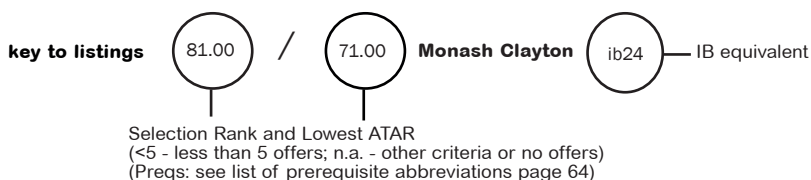

Communications is most often studied as one specialisation within a broader degree, like arts or business.

In addition, the bulk of specialist communications degrees give you the flexibility to specialise in areas beyond communication.

An additional, relevant speciality could increase your chances of working in communications. For instance, your chances of working in communications would be

greatly increased by a specialisation in marketing, economics or accounting; a specialisation in environmental studies, IT or social work.

In reviewing these options you need to take into account the decimation of opportunities in traditional journalism and how information and communications technology has embedded 'new media' imperatives within mainstream business and social interactions.

design and arts

Information & communication tech has transformed design and visual arts. It is now less on the sidelines of being an individual art practice (of no particular relevance), and far more integrated into the mainstream activities of people & business.

Design and visual arts are now an integral part of our digital existence, whether for entertainment, communication or work. They have a relevance they have never had before.

Not only are there so many courses that formally integrate information and technology with design - such as a Bachelor of Design (Games) - but the visual arts themselves are breaking beyond their traditional forms and boundaries via the enabling power of I.T. and multimedia.

"There is quite a debate about it, but I would argue that the visual skills and discipline of drawing and painting are the foundation of your capabilities in the new (digital) media."

Charles Cooper
Lecturer, National Art School

education

Students completing Yr 12 and wishing to enrol in an undergraduate teaching course in Victoria will be required to have a minimum ATAR of 70. However, it looks as if this is being interpreted as a minimum Selection Rank (ATAR plus adjustment factors).

Literacy and Numeracy Test for Initial Teacher Education Students

Teacher education graduates are now required to have personal literacy and numeracy levels equivalent to the top 30% of the population. A literacy and numeracy test for initial teacher education students is used as the required means to demonstrate this.

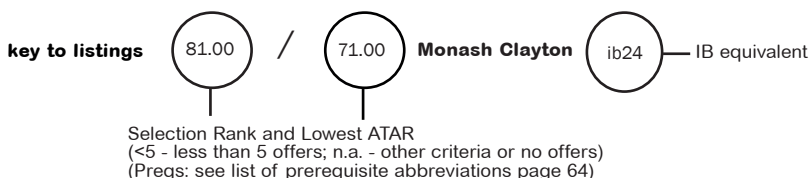

All students enrolled in an initial teacher education course will be expected to sit and meet the test standard prior to graduation.

Assessment of Personal Attributes

In addition, the Victorian Framework for Selection into Initial Teacher Education requires all admissions into initial teacher education courses to include a non-academic selection component that measures an applicant's personal attributes.

In most cases this is the CASPer – an online screening test designed to assess personal and professional qualities. See takecasper.com if you would like more information.

There is a charge of \$80.00 (in 2020) to take the CASPer. All Victorian universities except the University of Melbourne are listed as using CASPer, although for ACU an ACU Teacher Selector Statement is offered as a cost free alternative.

engineering

Engineers have the skills, real world experience and professional credibility that gives them options and possibilities in their professional careers.

Only accounting rivals engineering as a flexible, open-ended qualification that can take you anywhere – and accounting is not for everyone!

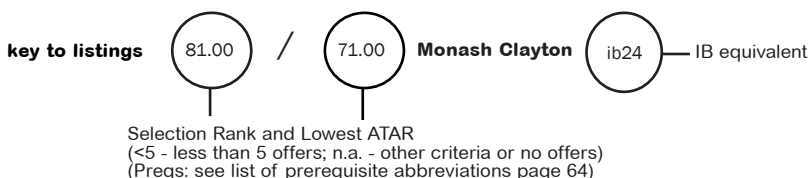

It is not just that there are so many specialised branches of engineering - whether aerospace, chemical, computer engineering, biomedical, mechanical and mechatronic, electronic and communications, maritime or civil and environmental.

It is as much that engineering qualifications have a recognition and credibility that can take you beyond a narrow, specialist role (and beyond engineering) if you wish - to broader business, management consulting and policy roles in this country and throughout the world.

many dimensions to engineering

Engineering work itself has extraordinary scope - from conceptual and design, to development/commercialisation of concepts and technology, to the management of specialised, local or large scale multi-million dollar projects.

It means that engineering can offer all sorts of career progression and accommodate all sorts of interests and capabilities, rather than there being a standard engineering type of the human species cloned over the ages.

Whilst engineering work is technically based, it is also an inherently interpersonal undertaking.

Engineers rarely work in isolation, but rather as part of a team of other professionals, with linkages to every operational area of an organisation in the design, implementation or management of engineering projects and functions.

Engineers start from a sound technical base, to then develop a technical authority and credibility. From this foundation they develop broadly based skills in getting things done and in working with others, whether clients (internal or external), suppliers or operational staff, and they usually move in stages from primarily technical responsibilities to the management of technical projects or operations.

This is the foundation of their reputation as managers,

enabling them, if they wish, to move from primarily technical engineering roles to managerial roles with ease, whether to project management, entrepreneurial ventures, consulting, investment analysis, policy and strategic planning areas of business and government – and to the very top of major corporations.

According to Wayne Davies, a successful consulting chemical engineer, “Engineering is 80% communication skills - whether written or oral - and 20% technical capabilities. Certainly you need to be able to apply engineering principles in a sound and creative manner, but the primary challenges are ones of communication - from the capacity to understand a brief, to utilising the insights of others, to articulating technical solutions and insights, as well as engaging those around you with a clear understanding of the

task at hand and its various dimensions.”

So choose a university engineering course that specifically develops those interpersonal capabilities as well as the technical ones - and make sure it is more than just a gesture or an add-on to a primarily technical focus. That can be one of the critical decision points.

An employment credential

An engineering qualification is a professional qualification, qualifying graduates for professional opportunities in the graduate labour market. For a great many other disciplines, a first degree is very often not enough in itself, and requires the completion of some other professional qualification.

In addition, the employment rate of engineering graduates, immediately after graduation, is usually far better than that of graduates overall.

If you love science and maths, engineering is the obvious choice. Only the very best graduates in science and maths have much of a chance to really use their high level skills (except in teaching).

In engineering, it is not an issue.

UCAT replaces UMAT

Many undergraduate medicine, dentistry and health science degree programs require a UCAT score (University Clinical Aptitude Test) as part of their selection criteria.

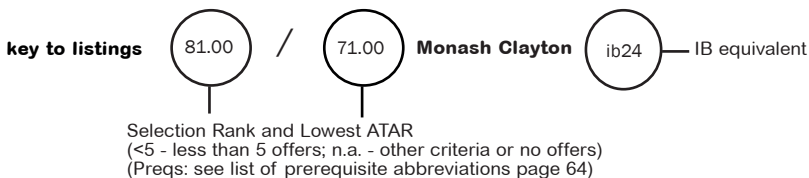

UCAT assesses a range of abilities considered important in a health professional.

UCAT is not a test of academic knowledge and does not require any special understanding of science or mathematics. It is a

two hour, computer-based test in a multiple-choice format.

The closing date to register for UCAT (for undergraduate degree programs commencing in 2022) is 17 May 2021 (or 31 May with late fee).

For further information and registration, go to ucat.edu.au/ucat-anz/

Undergraduate Medicine

University of Newcastle and UNE Joint Medical Program

B Medical Science/D Medicine

YEAR 12 ENTRY

Apply via UAC (ATAR of 94.30+ or 91.40+ for a high school in a rural/remote location, 2020 entry)

Plus direct online application

UCAT

Interview (Multiple Skills Assessment) and Online Personal Qualities Assessment

Subject Prerequisites: None

International Students: No

University of Sydney

B Arts/D Medicine

B Science/D Medicine

YEAR 12 ENTRY

High ATAR or equivalent - In 2021 it was 99.95

Interview

Subject Prerequisites: Mathematical Methods

International Students: Yes

University of New South Wales

B Medical Studies/D Medicine

B Arts/B Medical Studies/D Medicine

YEAR 12 ENTRY

Sydney and Port Macquarie

UAC

UCAT

Submit Medicine application form

Interview

Selection Rank 96.00+ (or 91.00+ for eligible rural applicants)

Subject Prerequisites: None

International Students: Yes

(ISAT instead of UCAT)

Graduate entry stream for UNSW Medicine

There is a pathway via the Bachelor of Medical Science for high-performing students.

Macquarie University

B Clinical Science pathway to D Medicine

YEAR 12 ENTRY

UAC

Selection Rank 90.00

Subject Prerequisites: None, but bridging courses may be required

Students will still need to meet specific Macquarie MD admission requirements including GPA, GAMSAT, satisfactory personal statement and performance in MMI

20 MMI places are reserved for B Clinical Science graduates

International Students: Yes

Western Sydney University & CSU

Joint Program

D Medicine

Year 12 entry and non-current school leaver

UAC

UCAT

Direct application

Interview

Selection Rank 95.5 for non-GWS (93.5 for applicants from Greater Western Sydney)

Subject Prerequisites: None

International Students: Yes, direct application to International Office

Griffith University G Coast & Nathan

B Medical Sc (D Medicine Provisional Entry for school-leavers)

YEAR 12 ENTRY

QTAC 99.00+

Subject Prerequisites: English. Math Methods plus one of biological science, chemistry or physics assumed

Applicants who completed Year 12 no more than 3 years prior to application, and who have not previously attempted tertiary study at diploma level or higher are also eligible to apply

B Medical Sc guarantees entry to MD on achieving a GPA of at least 5 for the program

International Students: Yes

Bond University

B Medical Studies/Doctor Medicine

YEAR 12 ENTRY

(80% of applicants)

Selection Rank 97.00+

QTAC

Online psychometric test

Interview

Subject Prerequisites: Chemistry, Math Methods or equivalent or Physics

International Students: Not Year 12

University of Queensland

Doctor of Medicine

YEAR 12 ENTRY

Provisional Entry for School Leavers

(Entry pathway for current school leavers who commence and complete an undergraduate program at UQ)

CQU Provisional Entry Program to UQ regional via B Medical Science

Selection Rank 95.00+

QTAC

UCAT

Subject Prerequisites: Initial undergraduate degrees must include the two subject prerequisites Integrative Cell & Tissue Biology and System Physiology

Interview (Multiple Mini Interview)

International Students: Yes

James Cook University

B Medicine/B Surgery

YEAR 12 ENTRY

QTAC

Direct application

Interview

Subject Prerequisites: English, Chemistry, Math Methods, (Physics desirable)

International Students: Yes

Charles Darwin University

B Clinical Sciences/D Medicine (Flinders)

YEAR 12 ENTRY

Selection Rank 90+

UCAT**SATAC**

Pre-medicine pathway with guaranteed entry to Flinders University's D

Medicine in the third year (taught in the NT), subject to meeting the course requirements for the B Clinical Sc in the first two years

Priority is given to Indigenous and NT residents

International Students: No

Flinders University

B Clinical Sciences/D Medicine

YEAR 12 ENTRY**SATAC****UCAT**

Selection Rank 95+

Subject Prerequisites: None

International Students: Yes

Students are required to pass all topics in the first two years of Clinical Sciences with a minimum Grade Point Average of 5 (Credit average) in order to progress to the MD component

GRADUATE ENTRY

A Flinders undergraduate degree can be used as a graduate entry pathway into the Doctor of Medicine, with up to 75 per cent of places reserved for Flinders graduates who meet the admission requirements

University of Adelaide

B Medical Studies/D Medicine

YEAR 12 ENTRY

Selection Rank 90+

SATAC**UCAT + Interview**

Subject Prerequisites: Math Methods or Biology or Chemistry

International Students: Yes

Applicants with tertiary record ineligible unless studied Year 1 or 2 exclusively at University of Adelaide

Monash University

B Medical Science/D Medicine

YEAR 12 ENTRY**VTAC****UCAT**

Interview (Multiple Mini Interview)

Subject Prerequisites: VCE Units 3 and 4 - a study score equivalent to at least 35 in English (ESL) or 30 in any other English and a study score of at least 30 in Chemistry in VCE

International Students: Yes (ISAT instead of UCAT)

At least 70 per cent of places available into the Graduate Entry MD will be reserved for students who have completed the Monash Bachelor of Biomedical Science; the remaining places for students who have completed the following Monash degrees: B Biomedical Science, B Pharmacy, B Physiotherapy or B Science (with designated units)

University of Melbourne

Doctor of Medicine guaranteed entry
The majority of students enter following an undergraduate degree

However, the following guaranteed entry pathway is available after Year 12

YEAR 12 ENTRY**VTAC**

Applicants who receive a Selection Rank between 99.00 and 99.85 in Year 12 and commence and complete an undergraduate course at the University of Melbourne with a weighted average mark of 75% or higher are guaranteed an Australian fee place (for domestic students) or international fee place. Satisfactory performance at a multi-mini interview will be required in order to demonstrate adequate communication skills

International Students: Yes

La Trobe University

83.55/88.05 La Trobe Albury W (ib31)

84.20/83.00 La Trobe Bendigo (ib29)

B Biomedical Science (Medical)

Regional pathway

YEAR 12 ENTRY

Admission into the Bachelor of Biomedical Science (Medical) and successful completion of subjects with a WAM (weighted average mark) of 75 or higher will meet the admission criteria defined for the Doctor of Medicine (Rural) offered by The University of Melbourne at their Shepparton campus

Subject Prerequisites: None

University of Tasmania

B Medicine/B Surgery

YEAR 12 ENTRY**UCAT**

Selection Rank 95+

Subject Prerequisites: Chemistry

International Students: Yes

LATER YEAR ENTRY

Via the University of Tasmania's Bachelor of Medical Research

Students studying the Bachelor of Medical Research can only apply during their final year of study

Non-year 12 leaver entry to the MBBS from 2023 will be on completion of a bachelor's degree only. With 50% of non-year 12 applicants being from the preferred pathway course, the Bachelor of Medical Research

Subject Prerequisites: Chemistry is a prerequisite for the Bachelor of Medical Research

Curtin University

B Medicine/B Surgery

YEAR 12 ENTRY**ATAR 95+****TISC****UCAT****Interview**

Subject Prerequisites: English, Chemistry
Study in one of the following Mathematics
ATAR courses is desirable: Math Methods
or Specialist Maths, or equivalent
School leaver applicants need to submit
Predicted ATAR form

International Students: No**The University of Auckland**

Pathway to B Medicine/B Surgery

YEAR 12 ENTRY

Step 1 - Competitive rank score entry into
first year of either BSc (Biomedical) or BHSc

Step 2 - Competitive entry at end of year
1 of B Health Sciences or B Science in
Biomedical Science based on UCAT, marks,
interview

International Students: Yes**University of Otago**

B Medicine/B Surgery

YEAR 12 ENTRY

Competitive entry via U. Otago Health
Sciences First Year course. Selection into
Medicine is determined by a combination
of an applicant's academic grades in HSFY
(67%) and weighted UCAT result (33%).

Subject Prerequisites: None, but
Chemistry, Physics and Biology highly
recommended

International Students: Limited number
of places**University Western Australia**

Doctor of Medicine (MD)

YEAR 12 ENTRY

Direct Pathway

TISC**UCAT****Interview****Selection Rank 99.00** (96.00 rural etc.)

There is no direct entry into medicine.
All applicants will have to complete an
undergraduate degree first. A number
of places will be available for students
offered a place on the Direct Pathway who
will be guaranteed a place in the Doctor
of Medicine on completion of a UWA
degree with a grade point average of 5.5.
Subject Prerequisites: English or English
Literature (or EAL for eligible students).
Biology, Chemistry, Math Methods and
Physics are recommended. Applicants
should check if there are any prerequisites
for the undergraduate degree they wish to
study first.

International Students: Yes (ISAT instead
of UCAT)**Australian National University**D Medicine and Surgery - Pathway
programs**B Health Science****UAC****Selection Rank 90.00+** and
supplementary application form

Subject Prerequisites: None, but
Chemistry highly recommended
At the end of their second year up to 30
students will receive an offer of entry
to the Doctor of Medicine and Surgery,
contingent upon their grade point average
(GPA), an interview process, and successful
completion of the Bachelor of Health
Science.

International Students: Yes**B Philosophy (Hons) - Science****UAC****Selection Rank 99.00** and supplementary
application form and referee reports**Subject Prerequisites:** None, but basic
science would be beneficial**International Students:** Yes**GAMSAT and graduate
entry medical and dentistry
degrees**

Twelve medical schools -
ANU, Deakin, Flinders, Griffith,
Macquarie, Melbourne,
Monash, Notre Dame
(Fremantle and Sydney),
Queensland, Sydney, Western
Australia and Wollongong -
admit graduates to a 4-year
graduate-entry medical
degree program.

For most institutions,
prerequisites are acceptable
performance in a bachelor
degree in any discipline,
acceptable standard

on GAMSAT (except at
Monash), and (except at UQ)
performance at interview.
Some universities may
additionally require the
submission of a Portfolio or
Personal Statement.

Monash requires a specified
Monash degree as listed
[online](#) and does not require a
GAMSAT score.

Three dental schools – at
the University of Western
Australia, the University of
Sydney and the University of
Melbourne – admit graduates
into a four-year graduate-
entry program.

University of Melbourne

YEAR 12 ENTRY

98.50/98.50 U Melbourne in 2021

B Science/D Veterinary Medicine

(Preqs: MM and B C SM or P)

The majority of students enter following an undergraduate degree with the required prerequisites

However, the following guaranteed entry pathways are available after Year 12:

Selection Rank 98.50+

Bachelor of Science with a major in Animal Health and Disease (Veterinary Bioscience specialisation) is required. H2B (70%) weighted average in both first and second year science subjects - guarantees entry into the Veterinary Bioscience specialisation (third year) subject to Personal Statement. Following completion of the Bachelor of Science, an offer into the DVM on a Commonwealth Supported Place (domestic students) or international fee place.

Subject Prerequisites: For the BSc - English, Math Methods + one of Biology, Chemistry, Physics, Specialist Mathematics

International Students: Yes

67.00/57.35 La Trobe Melbourne

B Veterinary Nursing

(Preqs: B C or Maths (any))

What exactly are health science courses?

Every university these days seems to offer a Bachelor of Health Sciences or something along those lines. But what exactly is health science, and what is its relationship to medical science?

In most cases, health science degrees provide a multidisciplinary overview of health care and biomedical science. They are not a specialisation in human biomedical science and are not designed for laboratory and research opportunities in biomedical science itself.

Health science degrees (sometimes under the Applied Science designation) have two primary groupings:

- programs for students who want to enter the non-clinical health workforce in public health, health promotion, health management, nutrition, indigenous health

- foundation for subsequent postgraduate clinical degrees in areas such as physiotherapy, occupational therapy, paramedical, medicine etc) and are often specifically linked with those clinical areas as part of a combined degree program.

On the other hand, medical science or biomedical science degrees combine traditional scientific disciplines (biology, chemistry, biochemistry, molecular biology) with those related to medicine (e.g. anatomy, physiology, pathology, pharmacology, immunology).

They prepare graduates for work in a wide range of laboratory settings in medical research, diagnostic pathology, pharmaceutical or hospital laboratories. They also can serve as a foundation for students intending to study medicine as a postgraduate course, as well as for other clinical postgraduate degrees.

humanities

Do not underestimate Arts degrees. Because you can choose from a myriad of subjects, Arts degrees can be as relevant as you wish.

You can pursue your interests in the humanities and take, at the same time, subjects that are specifically labour market oriented - such as economics, psychology, maths, statistics, human resource management, journalism, law and science subjects. It's even possible to do geology within some Arts degrees.

And of course, Arts degrees are very often the pathway to teaching, one of the main destinations of Arts graduates, as well as to a range of subsequent professional degrees, whether law, urban planning or environmental management.

The various names for psychology courses and professional recognition

Four year undergraduate honours degrees in psychology are now increasingly called Bachelor of Psychology.

Three year degrees (which can lead to a fourth honours year in psychology in most cases) are called 'Bachelor of Psychological Science'.

But Psychology can also be taken as a specialisation within other degrees and can still be a pathway to professional recognition. In fact, this is the traditional way of obtaining qualifications in psychology and in some ways is still the best option, giving you the greatest flexibility in structuring your degree and in the subsequent graduate employment market.

This is the way you do it at the majority of the big name universities, although

they too are succumbing to the trend to extract psychology as an option from arts and science degrees and to confine psychology to narrower, professionally labelled, specialist degrees.

When you aren't allowed to do psychology any longer in an arts or science degree, a new subject which may be called something like 'Studies in Psychology' is often introduced - which is probably 'psychology light' - but these are not accepted for professional accreditation.

Professional recognition

It's worth checking whether or not a particular degree or major in psychology is professionally recognised.

Under the Health Practitioner Regulation National Law Act, courses must be accredited by the Australian Psychology Accreditation Council (APAC) for registration as a psychologist.

information technology

I.T. is now a broad term to encompass not just its electronic and mathematical foundations, but info systems analysis, software development and the use of software in so many different ways, whether in business, communications or entertainment.

‘Big data’

While the term ‘big data’ is relatively new and sounds rather nice, statistics, econometrics and computing have long provided the academic and professional framework for analysing and modelling data on a large scale and remain the foundation of ‘big data’ and the associated data analytics or data science.

What is different now is the sheer unimaginable volume of electronic data that is generated through the internet-enabled framework of almost everything we do. In addition, advances in storage and analytics mean that we can capture, store and work with many, many different types of data.

‘Data’ can now mean anything from photos, videos, sound recordings, written text,

transactional, GPS and sensor data. Every action and event now seems to leave a digital footprint, thereby in an aggregated form creating such potential for analysis and use for all manner of purposes, whether social control, corporate marketing or epidemiology. It’s a new world of possibility, and ‘big data’ is the new-age term for it.

Big data brings together computing, statistics, emerging internet technologies and media. It draws on the core technical computational and analytical capabilities of statistics and computer science, to capture, manage and analyse large data sets. It is associated with advanced analytical techniques such as text analytics, machine learning, predictive analytics, data mining, statistics and natural language processing to analyse traditional and previously untapped data sources.

For instance, Google Translate operates by analysing hundreds of millions of documents that have been translated by humans and looking for patterns and rules that it can use. This is an example of what computer scientists call “machine learning”, and it can deliver astonishing results.

Within data science courses, foundation studies in programming and statistics form the basis of higher-level studies in data mining, data security and computer simulation.

So, big data is new age, but at its core it is a quantitative/mathematical/computational endeavour coupled with an understanding of internet technologies. The skills developed in any statistics or computer science course could be a good starting point for entry do it, not just the courses specifically labelled ‘data science’ or ‘data analytics’.

performing arts

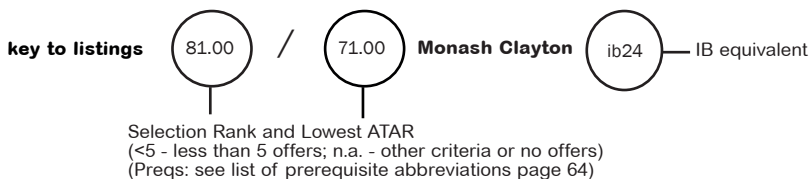

It's no problem at all getting into a drama course somewhere. But you need persistence, talent & engagement to get into a serious theatre program.

The real challenge starts once you graduate - when you need the mental toughness to deal with the many rejections, the need to be continually trying to impress others, the utter financial insecurity and the resilience to maintain your confidence, ethic and belief.

But when it comes off, the adrenalin and sense of accomplishment is profound. The sky is the limit then.

In addition to specialist performing arts degrees, performing arts (drama particularly) may be taken as a specialisation within arts degrees.

Entry to these programs generally does not require auditions or prior study in a related area and they lack the professional credibility that the specialist programs would offer.

science

Despite the frequent claims, graduate destination stats provide no evidence to suggest that there is a shortage of science grads in Australia.

And there are persistent reports about the insecure, short-term contracts for early career researchers and tightening funding for science. But science (and humanities) graduates are the most satisfied with their courses. In addition, secondary teachers in subjects like

languages, mathematics, physics, chemistry, geography and I.T. are already in short supply in some areas. As the rising numbers of students enter secondary schools (from about 2018) it is likely that shortages in some subjects will become acute.

notes on course listings

The entry levels listed for each Victorian course are the lowest Selection Rank – the ATAR plus any adjustment factors – of applicants admitted to a course, as well as the lowest ATAR, excluding adjustment factors, of applicants admitted.

n.a. Entry criteria other than a simple ATAR or no offers.

<5 less than 5 offers and no reliable Selection Rank/ATAR able to be calculated. (Courses with less than 5 offers may not always be listed.)

Scholarship courses – Deans Scholars or VCs Scholars etc. are not included except for the University of Melbourne and a number of Swinburne ones.

The numbers involved for each course are usually too small (often just 1) to warrant inclusion.

Prerequisites listed

In order to save space, the following abbreviations are used for prerequisites: ^{1,2}

B = Biology; C = Chemistry;
G = Geography; P = Physics;
MM = Mathematical Methods;
Maths (any) is any unit 3 and 4 sequence in mathematics, so it is not the same as 'Some mathematics'
H&HD = Health & Human Development
PE = Physical Education
Env = Environmental Science
O&ES = Outdoor and Environmental Studies.

1. Some maths includes two categories often listed by universities:

- a. General Maths or Mathematical Methods units 1 and 2, or Mathematics (any) units 3 and 4; and
- b. Mathematics (any) units 1 and 2. Foundation Maths is not sufficient.

2. Art & Design includes any one of four categories:

- Art or Studio Arts;
- Art \ Product Design & Technology \ Media \ Studio Arts or Visual Communication Design;
- Art \ Product Design & Technology \ Media \ Studio Arts \ Systems Engineering or Visual Communication Design;
- Art \ Studio Art or Visual Communication Design.
