Company

Da oltre 60 anni Fima Carlo Frattini realizza rubinetteria di alta qualità, durevole e capace di valorizzare ogni progetto. Innovativa e creativa, combina eccellenza del design, qualità produttiva, ricerca e crescita internazionale.

For over 60 years, Fima Carlo Frattini has delivered high-quality tapware that lasts and adds value to every project. Constantly evolving through creativity, design and technology, it combines design excellence, quality production, research and international growth.

Care

La cura è evidente in ogni prodotto Fima, dove un design meticoloso e un servizio attento garantiscono qualità, comfort e facilità d'uso. Pratiche sostenibili guidano la produzione, proteggendo l'ambiente e creando rubinetteria duratura e affidabile.

Care is reflected in every Fima product, where meticulous design and thoughtful service ensure quality, comfort, and ease of use. Sustainable practices guide production, protecting the environment while creating long-lasting, reliable tapware.

Elegance

L'eleganza definisce l'approccio al design di Fima. Ogni prodotto bilancia forma, proporzioni e texture, combinando materiali e finiture per creare un'estetica raffinata e sofisticata, elegante senza sforzo e di lusso.

Elegance defines Fima's approach to design. Each product balances form, proportion, and texture, blending materials and finishes to create a refined, sophisticated aesthetic that feels effortless yet luxurious.

Innovation

L'innovazione caratterizza ogni prodotto Fima. Tecnologie avanzate e materiali accuratamente selezionati si combinano per creare soluzioni funzionali, durevoli, eleganti e rispettose dell'ambiente, migliorando l'esperienza quotidiana.

Innovation shapes every Fima product. Advanced technologies and carefully selected materials combine to create solutions that are functional, durable, beautiful, and environmentally conscious, enhancing the everyday experience.

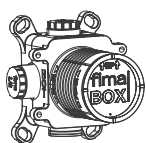

fima | CARLO FRATTINI
rubinetterie

Il Fimabox di Fima Carlo Frattini è un sistema da incasso progettato per un'installazione e un utilizzo semplici. Con il suo design universale, è rapido e intuitivo da assemblare, offrendo agli installatori la massima flessibilità e riducendo i tempi di lavoro in cantiere. L'involucro in plastica impermeabile e il corpo flottante in ottone evitano perdite e vibrazioni, garantendo un funzionamento silenzioso e una protezione duratura delle pareti. Resistente e anticorrosione, assicura affidabilità a lungo termine con una manutenzione minima.

The Fimabox by Fima Carlo Frattini is a built-in system designed for easy installation and use. With its universal design, it's quick and intuitive to assemble, giving plumbers total flexibility and saving valuable time on site. The watertight plastic casing and floating brass body prevent leaks and vibration, ensuring silent operation and long-term wall protection. Durable and corrosion-resistant, it offers long-lasting reliability with minimal maintenance.

Linee essenziali e curve morbide si incontrano in una collezione elegante e contemporanea. Una gamma completa per il bagno che esprime lusso, armonia e raffinata artigianalità italiana.

Clean lines and soft curves come together in an elegant, contemporary collection. A complete bathroom range that embodies luxury, harmony and refined Italian craftsmanship.

3 Hole Basin Set Black Chrome - F1301CN.1

FIMA PARK LANE

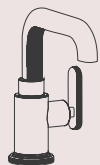

3 Hole Wall Set Amber Bronze - F1331/5ZL.1

La collezione Park Lane esprime una progettazione dei rubinetti meticolosa, dove le linee classiche e rotonde incontrano superfici sfaccettate arricchite da una distintiva texture Millerighe. Questo effetto testurizzato è ottenuto attraverso un processo industriale di produzione precisa e di alto standard, applicando anelli e cilindri volumetrici sovrapposti al metallo. Combinato con superfici sfaccettate attentamente progettate e una varietà di finiture decorative, consente una personalizzazione raffinata, bilanciando un'estetica contemporanea con una sofisticazione senza tempo, mantenendo al contempo l'eccellenza e gli standard qualitativi del design italiano.

The Park Lane collection exemplifies meticulous tapware design, where classic round lines meet faceted surfaces enriched with a distinctive Millerighe texture. This textural effect is achieved through a precise, high-standard industrial manufacturing process, applying overlapping volumetric rings and cylinders to the metal. Combined with carefully engineered faceted surfaces and a range of decorative finishes, it allows refined customisation, balancing contemporary aesthetics with timeless sophistication while maintaining Italian design excellence and quality standards.

FIMA PARK LANE

La gamma docce Park Lane estende l'eleganza e la precisione distintive della collezione anche nella zona bagno. I miscelatori da incasso sono disponibili con piastra singola o rosette separate, garantendo prestazioni e controllo su misura. L'esclusiva doccetta, progettata specificamente per Park Lane, presenta la caratteristica lavorazione Millerighe, valorizzando luce e texture sulla superficie. Gli accessori complementari mantengono l'estetica raffinata della collezione, unendo funzionalità alla stessa cura del design e delle finiture presenti in tutti i rubinetti Park Lane.

The Park Lane shower range extends the collection's signature elegance and precision to the wet zone. Built-in mixers are available in single plate or separate rosette designs, providing tailored performance and control. The exclusive showerhead, designed specifically for Park Lane, features the iconic Millerighe detailing, enhancing light and texture across its surface. Complementary accessories maintain the collection's refined aesthetic, combining functionality with the same meticulous design and finishing found across all Park Lane tapware.

Installation Note: All shower units are supplied with a male threaded connection.
