Italian Excellence

Since 1974

Founded over 50 years ago in the picturesque town of Gozzano, on the shores of Lake Orta, Armando Vicario began as a small family workshop driven by a passion for precision engineering and craftsmanship. From the very beginning, the company's work has been inspired by water — both as a vital natural resource and as a source of creativity and design.

Over the decades, Armando Vicario has grown into a globally recognised brand of Italian tapware, combining tradition, design innovation, and technical expertise in every product. Under the guidance of the second generation, Daniele and Rossana Vicario, the company has expanded from kitchen taps to include bathroom mixers, shower components, and tailored solutions for residential and commercial projects. Every product is designed and manufactured in Italy, where premium materials, careful engineering, and rigorous quality standards reflect the brand's commitment to excellence.

Vicario balances timeless design with practical functionality. Each form, finish, and detail is carefully considered, creating tapware that complements both contemporary and classic interiors. Innovative technology and sustainable practices are central to the process: from energy-efficient production and solar-powered facilities to eco-conscious packaging and reduced material waste, the brand demonstrates a responsible approach to craftsmanship without compromising style or performance.

The company thrives on a spirit of continuous improvement. Research and development, combined with attention to detail and customer needs, ensures each collection meets the highest standards of usability, durability, and aesthetic appeal. Vicario has earned the trust of architects, designers, and homeowners worldwide, establishing a reputation for elegant, reliable, and forward-thinking tapware.

Philosophy & Values

Heritage

A story shaped by family, tradition and over five decades of Italian craftsmanship. From its origins as a small workshop to a globally recognised brand, Vicario continues to honour its legacy while evolving for contemporary living.

Water

More than a functional element, water is central to the brand's identity. Inspired by the natural landscape of Lake Orta, each collection is designed to elevate the everyday water experience through form, performance and thoughtful innovation.

LUMIÈRE

ELEGANCE IS GOOD TASTE,
PLUS A DASH OF DARING

Carmel Snow

Inspired by the elegance of 1920s Paris, the Lumière Collection by Armando Vicario combines bold geometric forms with refined finishes. Signature black crystal inlays, sculptural lines, and subtle textures bring a touch of Parisian glamour to every space.

Handmade with precision, each piece balances linear and curved forms, creating a timeless interplay of light, shadow, and depth. Every detail reflects generations of Italian craftsmanship, a modern tribute to Art Deco, re-imagined for today's luxury interiors.

Basin Mixer - 500680-T-LF

3-Piece Wall Basin Mixer - 500684-BG-LF

Sculpted. Balanced. Intentional.

Where geometry meets refinement,
and every detail serves a purpose.

2-Way Diverter - 800838-BBN-LF

Universal Internals

Universal internals are designed to provide flexibility throughout the build and beyond. Each internal body is matched to its compatible tapware application, allowing the in-wall plumbing to be installed during the rough-in stage while the final trim style and finish can be selected later. This approach simplifies the build process, helps avoid delays in finish selection, and allows compatible styles or finishes within the same range to be updated in the future without disturbing tiles or in-wall plumbing. A practical solution for both installers and homeowners, it offers design freedom with long-term adaptability.

Within the Armando Vicario Lumière collection, this system supports a refined approach to bathroom design, making it easier to coordinate finishes and update the aesthetic over time while maintaining compatibility within the range. Combining Italian design with practical flexibility, it offers a future-ready solution for evolving interior spaces.
