3 STAR 8.0L/min
WELS Registration #S13137

WHY Choose the Abey^{AU} VELA Range?

✓ Dual WELS Certified

The VELA Range is proudly certified under the **Australian Government's Water Efficiency Labelling and Standards (WELS) scheme**. Each Mixer is supplied with two WELS - rated aerators, giving consumers the flexibility to choose their preferred flow rate.

By Providing both aerators, Abey empowers users to tailor their installation for **performance, compliance and sustainability**.

✓ Revit Files

To make design and specification simple, the VELA Range now includes Revit files for all products. Revit files allow you to preview how VELA products fit within a bathroom design before installation.

These digital 3D models can be easily imported into architectural design programs, helping specifiers and builders plan layouts with accurate dimensions, clear product visuals, and all required technical data in one place.

Plan with precision. Design with confidence.

✓ Universal Mixer Internals

The VELA Range now features a new **Universal Mixer Internal System**, engineered for flexibility, efficiency and long-term adaptability.

With three new universal bodies — **Shower Mixer, Diverter Mixer, and Wall Basin/Bath Mixer** — this system allows a single in-wall installation to suit multiple VELA trim styles and finishes. Built from **premium materials** and tested to **Australian performance standards**, these universal bodies simplify specification, reduce waste, and future-proof your bathroom design.

Install once. Choose your finish later. Change the look — not the body.

High Class Mixer Tails

✓ The VELA Range is supplied with **High Class Mixer Tails** — precision-engineered flexible connectors built for superior performance, safety, and reliability. Each connector features premium polyamide braiding combined with the innovative **SOFTPEX® inner core**, a mechanical performance upgrade over standard EPDM rubber.

Every mixer tail is **Leadfree WaterMark certified and pressure-tested to Australian standards**, ensuring consistent performance and peace of mind across domestic and commercial installations.

Lead Free

✓ The VELA Range is lead free compliant. Lead-free compliant tapware will feature a new Watermark logo, which will be printed on product packaging and laser etched onto the product surface for easy identification.

Abey lead-free tapware will also include a product code ending with the letters "LF," indicating its lead-free status.

For example:

7SH-EXT-BN-LF + USH-INT-LF

This is how you can identify an Abey Lead Free product.

Visit an **Abey Showroom** to explore the possibilities.
