SERVICE OFFERING

Infrastructure upgrade

PROJECT SUMMARY

Augility has engaged Duratec to perform fuel infrastructure upgrades at the light vehicle refuelling facilities at Irwin Barracks, 10km south-west of Perth and Northam Army Camp, 80 kilometres east-north east of Perth.

SCOPE OF WORKS

Removal of existing tank (Irwin and Northam)

- Test and decommission of tank.
- Disposal of tank.
- Environmental testing of ground.

Installation of new storage tank (Irwin)

- Supply and installation of a new self-bunded fuel tank.
- Supply and installation of associated pipework.

The scope also includes the installation of an in-ground SPEL Puraceptor fuel/water separator connected to the stormwater drain, providing the site with the highest degree of environmental protection.

HIGHLIGHTS

- The works will be completed with minimal disruption to Defence operations.
- Duratec’s Environmental Consultant will test the ground after each part of the scope has been executed to ensure no environmental contamination occurs during the works.

Construction of new fuel tanks.

Construction of new concrete apron.
