DURATEC CONTACT

Andrew Kitto 0477 739 118

DESCRIPTION

Duratec has been engaged by Augility to deliver the following:

Design and construct new state-of-the-art dental facility followed by the decommissioning and demolition of the existing facility.

Consolidation of base power generator into one Central Emergency Power Station and decommission of the old generator.

Upgrade existing ditching pool filtration system, balance tanks, re-coat pool, add new chlorinator shed at Northern end and landscape open areas surrounding pool and new dental precinct.

HIGHLIGHTS

- ▶ Diverse project delivered to a high standard of quality.
- ▶ With end user input re-design of facilities completed to ensure the best operational solution was applied.
- ▶ Removal of contaminated materials and soils without incident.
- ▶ Installation of bulk fuel tank and commission generator to operate on diesel to match base bulk holdings.
