

# CORPORATE PROFILE

“Our goal is to assist you to achieve the highest quality, best value and safest outcomes for your next project.”

# Why Duratec

We are a solutions-driven contractor providing whole-of-life engineering, construction and remediation services for your assets. We operate across a wide range of industry sectors and are committed to providing you with fit-for-purpose, innovative solutions to meet the unique needs of your next project.

## Experience

Our extensive experience has positioned us as a market leader within our sector, with a reputation for technical expertise and intelligently engineered solutions.

Since the beginning, we have grown to become a well-respected company, with an established track record of being regularly re-engaged by our clients.

Engaging with us gives you access to a team of industry professionals dedicated to delivering high quality, safe, on-time and cost-effective projects.

## Innovation

By staying at the forefront of new technology, we offer you cutting-edge solutions. We understand that your projects have their own unique set of challenges and site conditions, so we approach them with an open and innovative mindset.

We embrace early contractor involvement, which allows you to benefit from our design and construct expertise in the conceptual phase of the project, impacting positively upon outcomes and providing value for money throughout the delivery stage.

### ENGINEERING

Our industry professionals provide rapid and accurate diagnosis of asset condition and degradation, including cost-effective durability solutions.

### CONSTRUCTION

As a licensed builder in all states, we offer design and construction services to replace structures that have reached the end of their serviceable life.

### REMEDiation

We offer the complete range of remediation services including responsive, scheduled and performance-based maintenance programs.

We specialise in end-to-end asset management, providing Early Contractor Involvement (ECI), condition assessments, technical services and asset refurbishment - catering to every stage of the life cycle of your asset.

This enables us to tailor your project program so that you can benefit from one, two or all of our service offerings, all provided by one trusted industry partner.

# Our difference

Our relationships are the driving force behind our business. Relationships with our people, the systems that keep them safe and the environments and communities in which we operate. Our national presence offers the diversity and experience of a large organisation while retaining the agility of a local business.

## People

Our people are the key to our success. We value them highly and believe it's important that we all feel part of a team, concerned about each other's safety and well-being.

We are proud of our enthusiastic, highly trained, skilled and stable workforce and we are committed to maintaining our family culture.

## Systems

Our business systems model integrates policies, procedures, plans and tools to support us in managing every aspect of our business.

Our best-practice health, safety, quality and environmental management systems enable us to deliver projects safely, to a high standard and without harm to the environment.

We aim for continual improvement in all that we do and are focused on ensuring our business systems enhance and support the evolution of our company.

## Sustainability

Sustainability is at the core of all our business activities and we adopt strategies and practices that aim to meet the needs of today without compromising the resources that will be needed in the future.

We embrace change and focus on continuously improving our safety, environmental, economic, social and cultural outcomes.

## Community

Wherever we work, we strive to engage with the local community.

We recognise that developing successful relationships is a key factor in building a sustainable future for both the communities we work in and for our company.

We stand behind our community commitment by providing employment to local people and supporting local suppliers and subcontractors. We are also proud to sponsor a number of Australia-wide community organisations.

## Local presence, national reach

From central business districts to remote regional areas, we operate wherever you do.

All of our regional branches are full service offices with dedicated state and project managers, support staff and a local workforce who can rapidly mobilise to site. This means, that wherever you are, you benefit from our local knowledge and services, all backed by the reassurance of a large and stable nationwide network.

In the areas where we work, we create employment, support local businesses and contribute to the economy by using local products and services.

## Certifications and Associations

Since 2010 our clients' belief and investment in us has made Duratec the success we are today.

# Our story

Driven by our success, we have expanded, forming new branches across Australia and establishing new divisions dedicated to delivering the services that meet our clients' needs.

## Establishment and expansion

We established our first operations in 2010, introducing a new model of solutions-based remedial contracting. By 2014 our reputation for client collaboration and successful project delivery resulted in the Australia-wide expansion of the business.

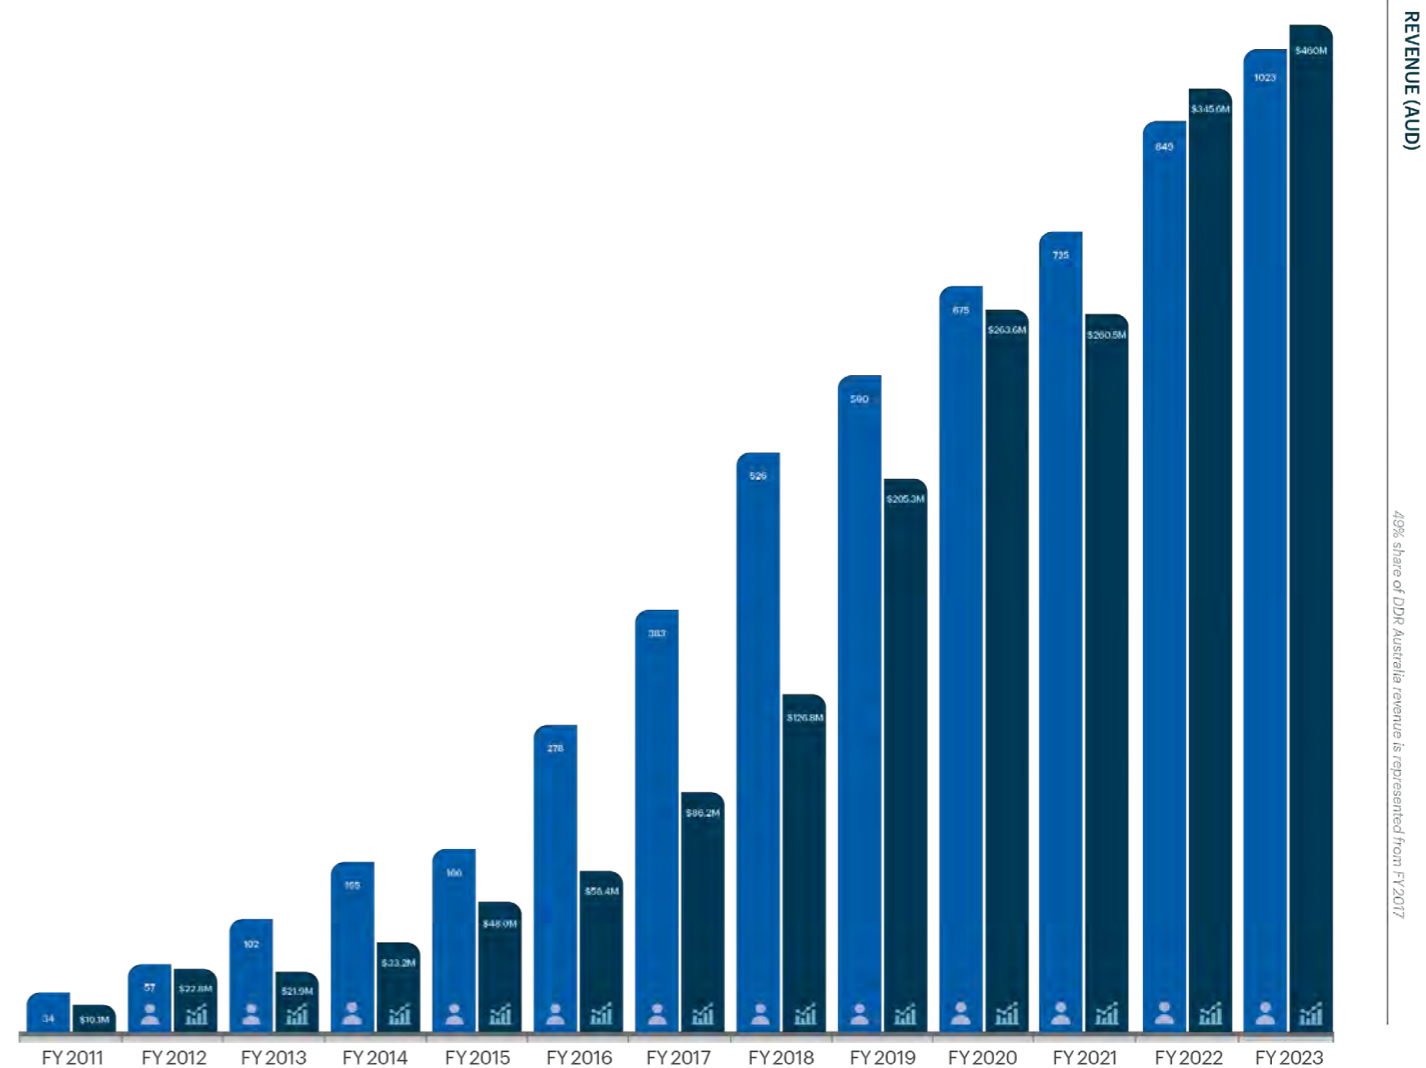

To service a growing industry need, we formed a dedicated defence division in 2016, which rapidly grew to become a national specialist contracting business.

Growth continued in 2017 with the acquisition of durability engineering specialists MEN Consulting and in 2018 through a joint venture partnership operating as DDR Australia. In 2020 Duratec (ASX: DUR) listed on the Australian Stock Exchange and in 2022 successfully acquired Wilson's Pipe Fabrication.

We are regularly re-engaged by our clients and maintain a long-term presence on many of their sites across Australia.

Our Vision is to sustainably grow our business and become the most respected specialist civil contractor, providing technological, innovative solutions to our existing and future clients.

PERSONNEL

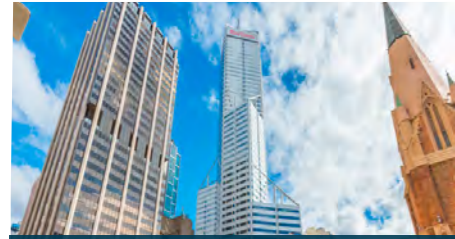

REVENUE (AUD)

49% share of DDR Australia revenue is represented from FY 2017

# Market industries serviced

We are a trusted partner for a wide range of clients in every industry sector. We harness our experience and national footprint to create programs that address the specific concerns of your industry and the unique needs of your project.

## Building & Facades

Ensuring public safety and minimising disruption to tenants and visitors.

## Defence

Maintaining Defence capability and security of the project work site and upholding the reputation of the Department with all stakeholders.

## Energy

Maintaining optimal productivity and supply and minimising off-line time

## Heritage

Accurately replicating historic materials and ensuring that underlying issues are rectified without compromising the structure's unique appearance.

## Marine

Limiting interruptions to live docks and wharves and preserving sensitive marine environments.

## Mining & Industrial

Maximising the operational life of assets and equipment and avoiding costly unscheduled shutdowns.

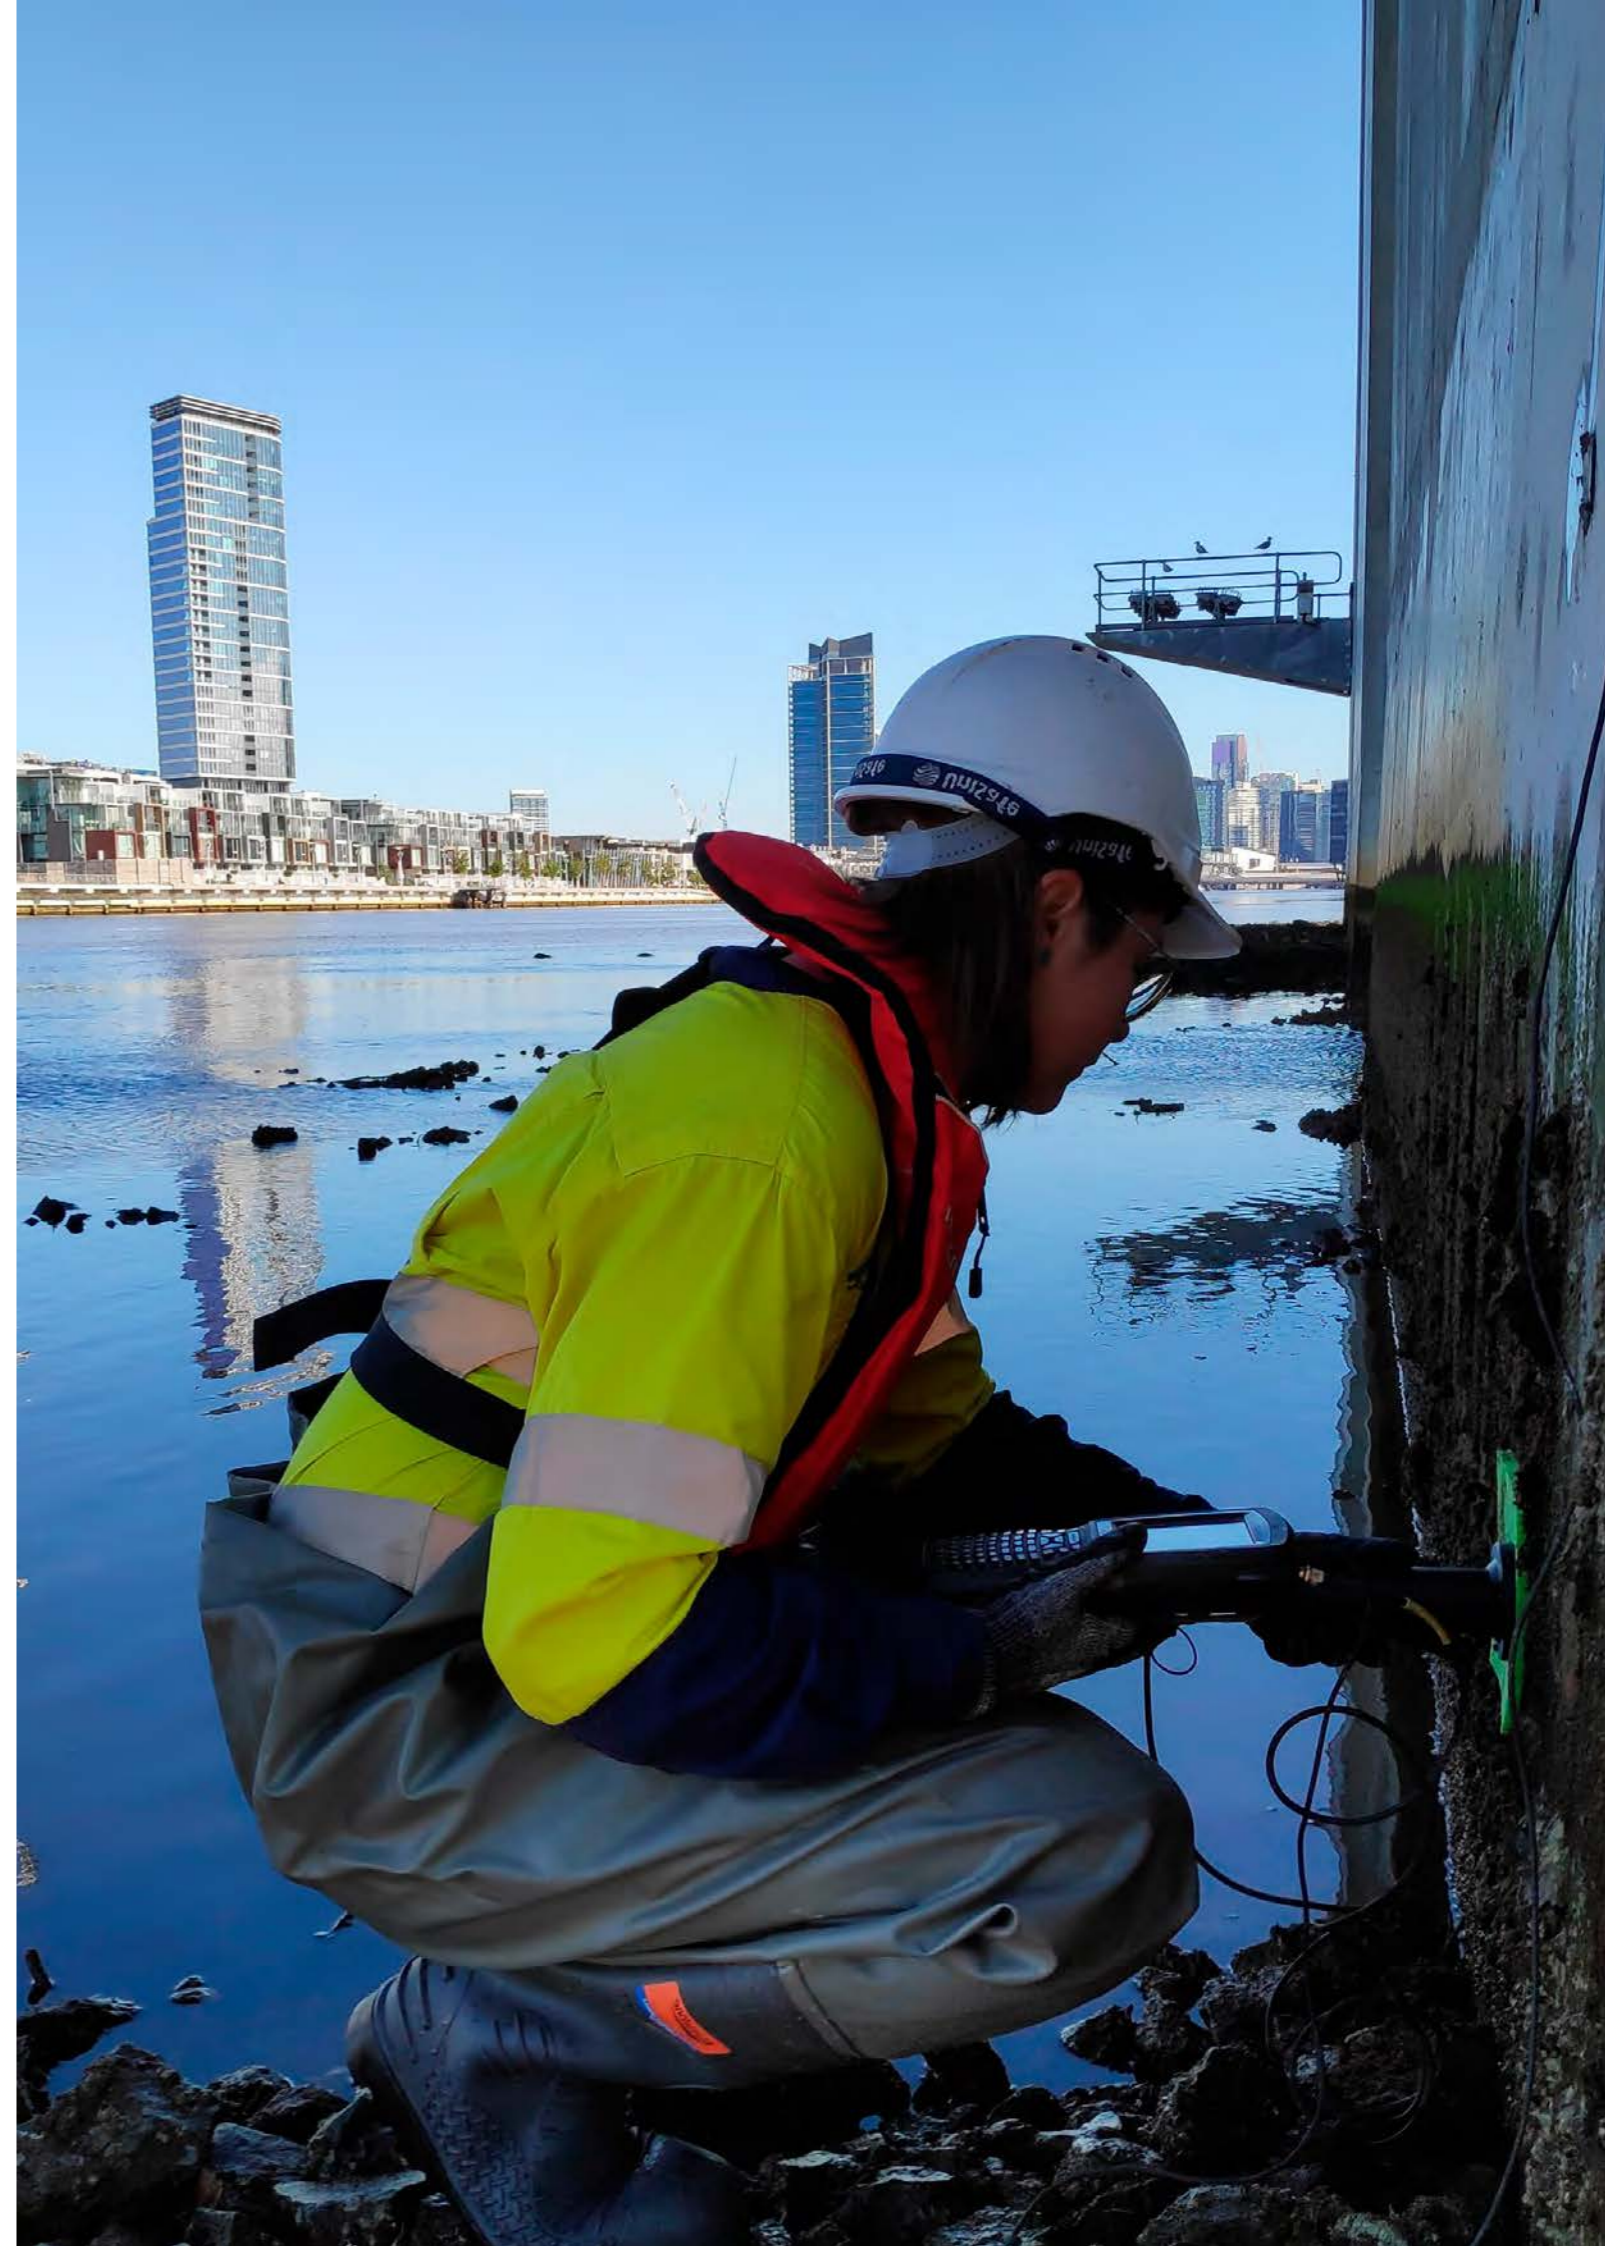

## Transport

Ensuring unobstructed public access to networks and lengthening asset service life.

## Water Infrastructure

Maintaining optimal productivity and supply and minimising off-line time.

# Our services

Whether you need our diagnostic services to assess the condition of your asset, a brand new build, or a remediation program to extend the life of an existing structure, we've got you covered.

## Asset protection

The protection of assets from corrosion is a key commercial, safety and environmental issue. Our expertise in the selection and application of high protective coating systems will significantly enhance your asset's operational performance and working lifespan. We use digital defect management to deliver significant value and savings to clients.

SERVICE OFFERING	
Abrasive blasting & painting	Cathodic protection
Concrete repair	High performance coatings
Joint remediation	Waterproofing
Acid protection	Flooring systems

## Building refurbishment

We understand that building refurbishments need to be executed with critical attention to public safety, minimal disruption to tenants and visitors, and detailed planning and communication with all stakeholders.

SERVICE OFFERING	
Facade refurbishments	Wet and dry fire systems
Asbestos & lead paint removal	Cladding replacement
Building fit out	Glazing replacement & repair
Electrical upgrades	Painting

## Infrastructure upgrades

Our expertise in maintaining and upgrading existing infrastructure that has reached or is nearing the end of its design life provides significant cost and time savings in comparison to new-build replacements.

SERVICE OFFERING	
Structural strengthening	Fuel infrastructure upgrades
Pile cleaning & protection	Abrasive blasting and painting
Fender repairs and upgrades	Concrete repair
Electrical upgrades	Precision grouting

## Durability engineering

We rapidly uncover the root causes of deterioration so that issues can be addressed in a timely and cost-effective manner. Once an assessment is complete, all findings are presented in a report including remedial options and realistic budget estimates.

SERVICE OFFERING	
Condition assessment	Non-destructive testing
Remedial engineering	Coating inspections
ROV, UAV & robotic inspection	Heritage Preservation
Petrography	Durability planning & materials

## Specialist access systems

Our in-house engineering capability enables the rapid design and installation of bespoke access systems for the delivery of inspection, maintenance and upgrade services across Australia.

SERVICE OFFERING	
Rope access	Scaffolding
Drone	Technical rigging
Elevated work platform	Fall arrest
Mastclimber	Work platforms

## Construction services

Our foundation was built on construction services and we are a licensed builder in all states of Australia. We deliver a range of multi-disciplined new and renovation construction projects for clients across a wide range of industry sectors.

SERVICE OFFERING	
Commercial buildings	Bridges
Utilities infrastructure	Oil and gas infrastructure
Wharves	Healthcare facilities
Electrical infrastructure	Defence infrastructure

# Whole-of-Life services for your assets

Our 360° management structure allows us to provide end-to-end service offerings enabled by our specialist technical services that begins with early contractor involvement through to the remediation of your assets.
