

MEPAU in the Mid West

NEWSLETTER | September 2025

MITSUMI E&P
Australia

Mitsui E&P Australia (MEPAU) is a WA based energy provider with two facilities in the Mid West. MEPAU is a significant contributor to the development of a sustainable supply of energy for the nation and in addition to maintaining its energy resource portfolio, is pursuing new low carbon energy and carbon abatement opportunities.

MEPAU at the Chapman Valley Agricultural Show

MEPAU hosted an information booth at the 75th Chapman Valley Agricultural Show, which celebrated its diamond anniversary this year.

The Chapman Valley Agricultural Society received a \$4,000 Mid West Community Grant to bring the popular Radrock climbing wall to the show. The free climbing wall, sponsored by MEPAU and Beach Energy was a huge hit, adding excitement to the family-friendly event.

MEPAU's information booth at the show featured a scale model of the Waitsia Gas Plant supporting conversations between our MEPAU people and attendees from across the region. Conversations ranged from gas processing to innovative projects such as carbon capture and storage (CCS).

MEPAU values these opportunities to connect with the community. Thank you to everyone who stopped by!

Schedule of activities

MEPAU maintains an online Schedule of Activities that is regularly updated with planned activity information and timing – go to mepau.com.au

Support for SHINE's educational programs

SHINE's educational programs, including Shine, Shimmer, and the new Emerging Women initiative, will be supported with \$150,000 over three years by MEPAU and Beach Energy.

The educational programs aim to help at-risk students stay engaged in education, build confidence, and develop life and employment skills. The Emerging Women program helps young women by offering mentoring, training, and support to continue studying or find a job. This partnership will support over 140 young women each year to build better futures in the Mid West.

Safeguarding Native Species

The House and Home: Safeguarding Native Species five-year project will receive \$650,000 from MEPAU and Beach Energy.

The Northern Agricultural Catchments Council Natural Resource Management (NACC NRM) project will focus on protecting threatened plants, restoring habitats for Carnaby's Cockatoo, managing pests, and engaging with the community.

NACC NRM CEO Katherine Allen said, "NACC NRM is pleased to partner with MEPAU and Beach Energy, to deliver improved outcomes for threatened flora and fauna in the Mid West. Landcare is a long game, and our shared commitment to this five-year project reflects that focus."

Eneabba Primary School celebrates new cubby

Eneabba Primary School has added a fun new feature to its playground — a cubby house funded by a \$4,000 Mid West Community Grant sponsored by MEPAU and Beach Energy.

The newly installed cubby house, named the *Eneabba PS Café*, gives students a place to play, use their imagination, and build social skills. As a regular host of interschool events, this upgrade means both local and visiting children can enjoy the benefits of the new play area. MEPAU is pleased to support initiatives that deliver long-lasting value to regional communities.
