15–41 dB insulation

REVISION

Rev 1
November 2026

200

Expertise and innovation in ceilings, from design to delivery.

About

SAS are a specialist designer and manufacturer of aesthetic and performance ceilings. Operating globally, we partner with architects, contractors and their clients across 70 markets. Together we have created better places to work, travel and live in over 2,000 cities.

Since our foundation in 1968, we have always felt honoured by the trust people place in us to create a ceiling. SAS has contributed to landmark projects that will never be replicated - and enhanced the places people visit every day.

We believe the benefits of our ceilings can, and should, stand the test of time. It's why we've invested in more sustainable materials, and committed deeply to circularity. So that the spaces above us can add value for years to come.

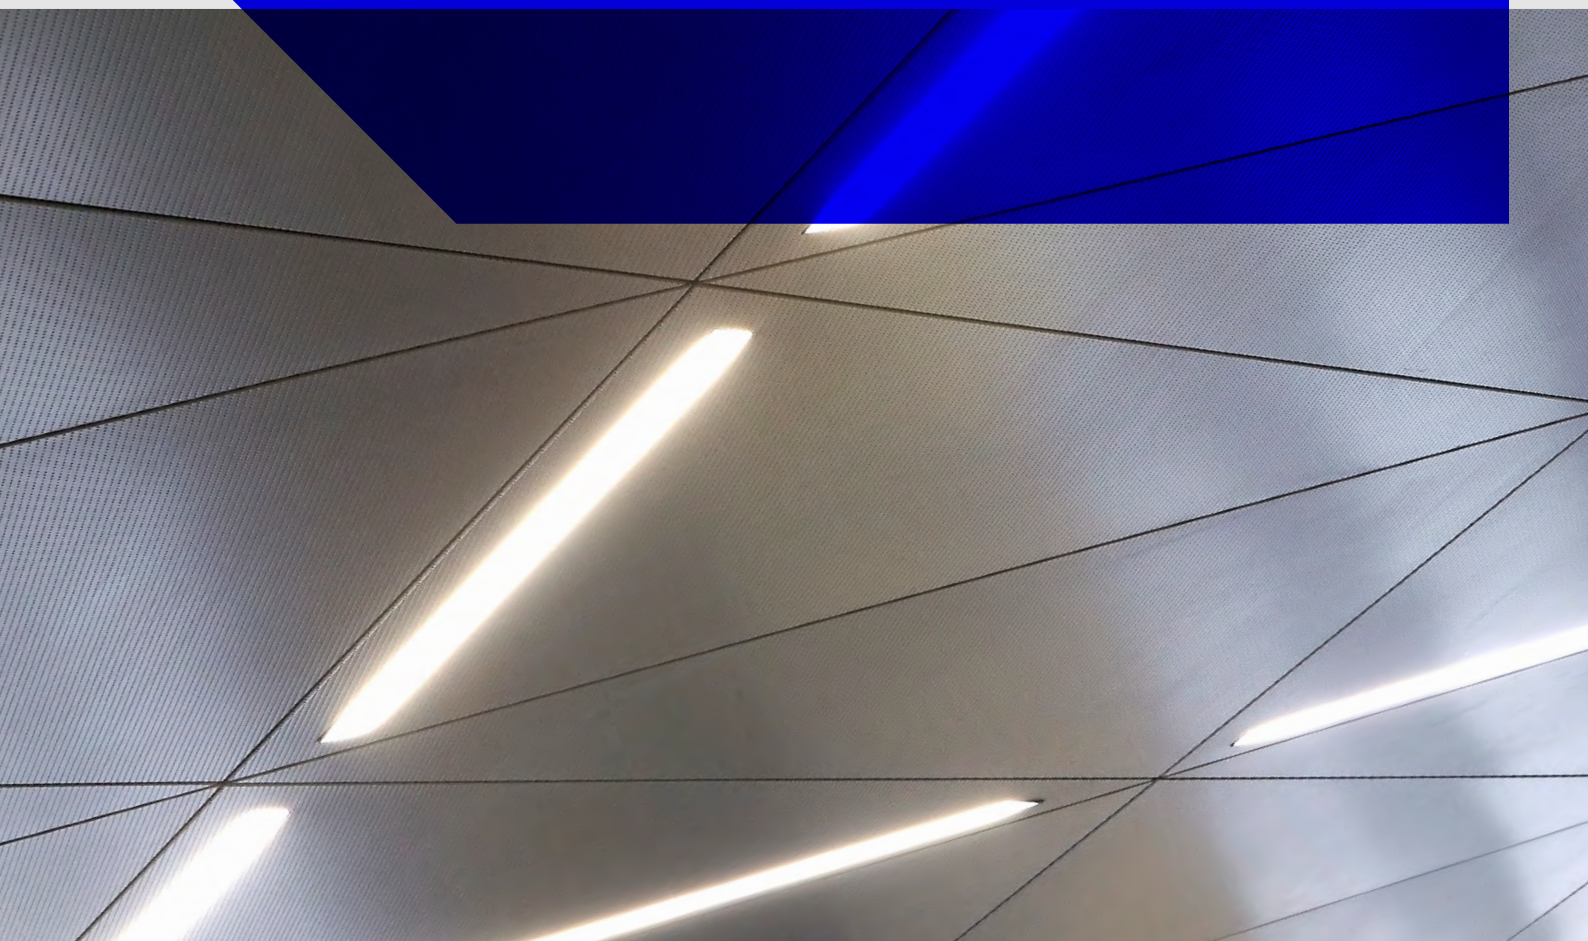

SAS200

SAS200 is a concealed grid suspended ceiling system offering significant creative flexibility.

One of the most adaptable metal ceiling systems available, it is ideal for bespoke applications. Modules can be manufactured in a variety of ways depending on application.

Designers are offered extensive creative freedom in tile size and geometry with this system - thanks to its J-Bar hook-on design.

SAS200 Overview

- Square-edged tiles can be manufactured to fit a range of module sizes and shapes
- Demountable tiles with swing-down access on tile hook edge
- Available as a chilled ceiling solution

Grid:	Concealed
Suspension:	Hook-On
Access:	Lift and Tilt
SAS Mesh:	Yes
SAS TexTiles:	Yes

OMERS, 122 Leadenhall, London

Location >
England

Architect >
HLW International

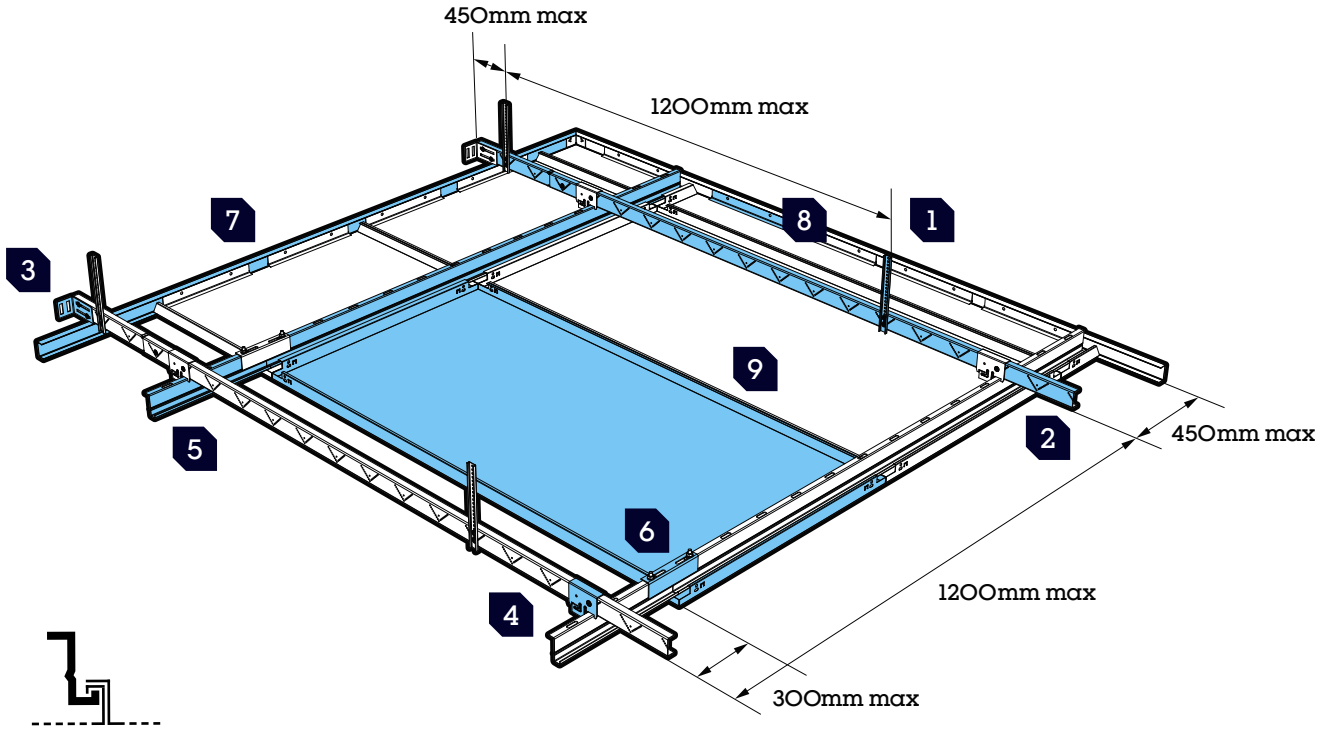

Contractor >
StructureTone Ltd

Purpose >
Commercial Office

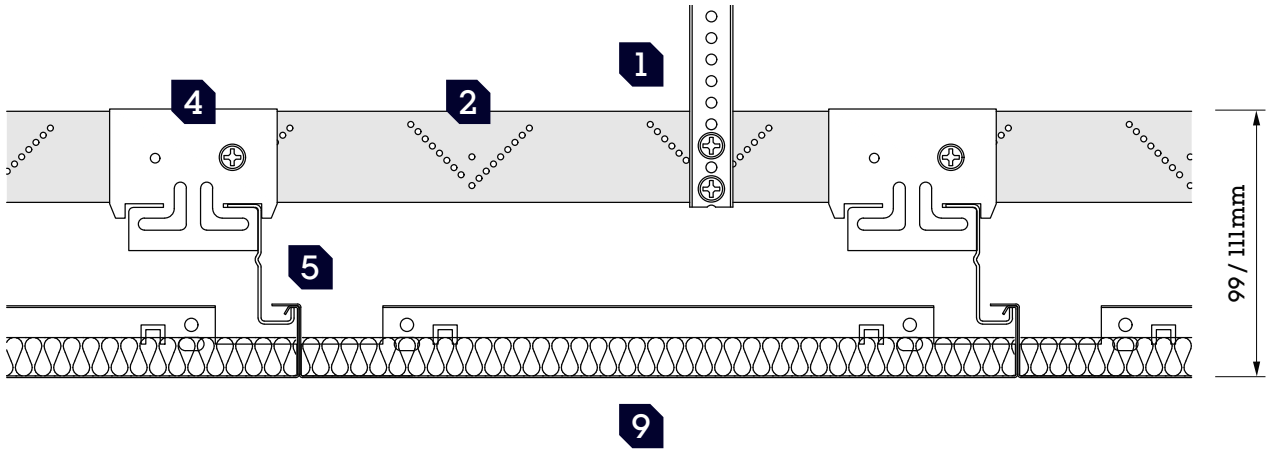

HLW was commissioned to reflect the iconic external design of the 'Cheesegrater' building internally, presenting a significant interior design challenge due to the complicated support structure. The SAS team recommended a tailored combination of systems to accommodate the challenging angled beams and complex equilateral theme. A concealed grid, bronze effect ceiling with square shaped perforations was used in reception and collaboration spaces, delivering corporate luxury alongside best-in-class acoustic performance.
