LAYING THE FOUNDATIONS FOR TOMORROW'S AUSTRALIA

We're Regional Group Australia—Australia's most trusted partner in construction materials and project delivery. With proven performance and deep local know-how, we keep infrastructure and development moving with quarry products, concrete, mobile solutions, and transport services.

Our end-to-end model means our customers can rely on us for efficiency, quality control, and value across the entire supply chain. By combining materials, services, and logistics under one roof, we remove complexity and keep your projects on track. Governments, councils, contractors, and private developers choose us because we deliver exactly what we promise.

Our people are engineers, designers, and operators who understand the demands of your projects and their conditions. We design, build, and manage complete or partial toll procurement solutions, from raw resource management through to finished goods ready to perform. With comprehensive engineering, design, and operational planning capability, we take ownership at every stage of the supply process.

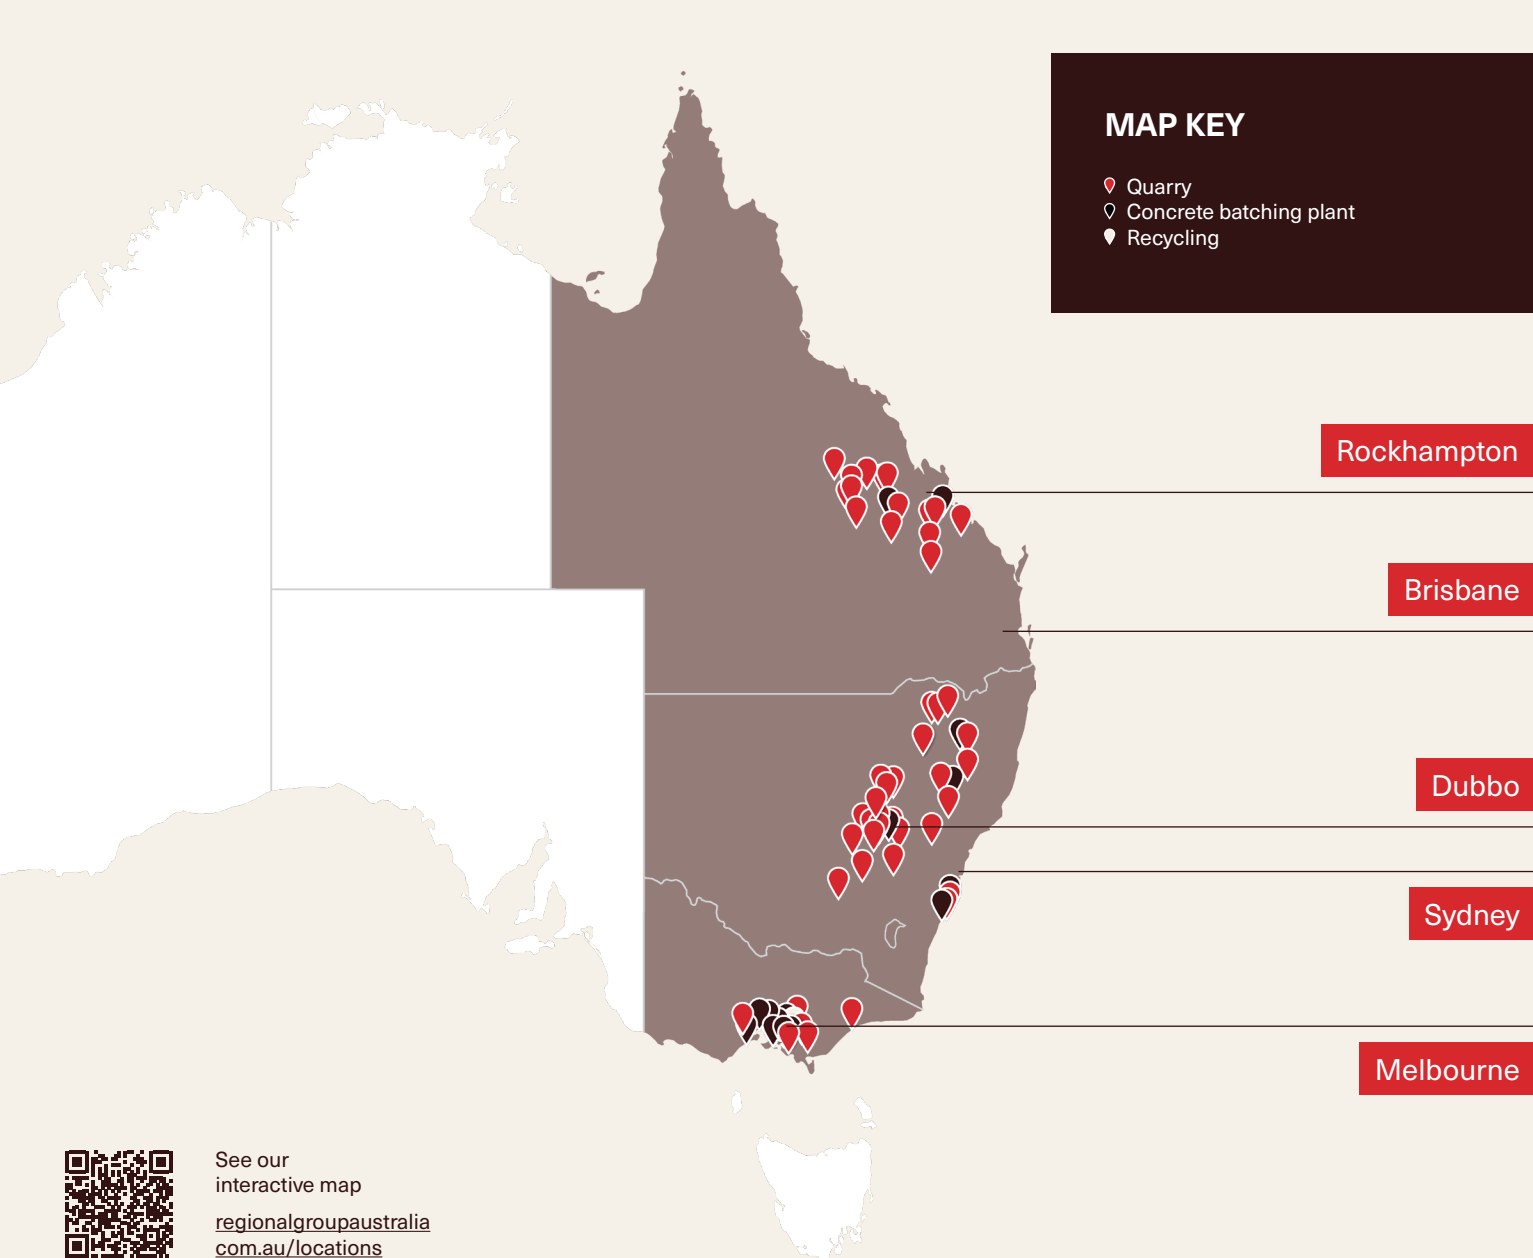

An aerial photograph of a large-scale aggregate processing facility. The site is characterized by vast, dark-colored storage piles of material, likely sand or gravel, which dominate the landscape. A complex network of conveyor belts and transfer stations is visible, facilitating the movement of material across the site. In the upper right corner, there are several industrial buildings, including one with a prominent blue corrugated metal roof. A line of yellow trucks is parked in a designated area in the lower right. The lighting suggests a low sun position, casting long shadows and highlighting the textures of the material piles.

OUR LOCATION

EXPERTISE FROM RESOURCE TO ROAD, ACROSS REGIONS AND METRO

Regional Group Australia has deep regional roots and a strong metropolitan presence, with a network of quarries and concrete plants stretching from Rockhampton in Central Queensland through to metropolitan Victoria. With one of the most extensive footprints in regional Australia, we have the scale and reach to keep major infrastructure projects supplied with consistent, high-quality materials from start to finish.

QUEENSLAND

- Black Hill Quarry
- Blackwater Quarry and Concrete
- Bore Creek Quarry
- Castle Creek Quarry
- Fairfield Quarry

VICTORIA

- Anakie Quarry
- Cranbourne Concrete
- Dandenong Concrete
- Deer Park Concrete
- Fyansford Concrete
- Granite Rock Quarry
- Grantville Commercial Sands
- Hallam Concrete
- Keilor Park Concrete
- Mt Speed Quarry
- Neerim North Quarry
- Pakenham Concrete
- Pakenham South Concrete
- Somerton Concrete
- Tyabb Concrete
- Yarra Valley Quarry
- Pakenham Recycling

Note: List excludes campaign sites, contact us to discuss availability in your region.

CAPABILITY STATEMENT

OUR QUARRIES

Our quarries stretch from Central Queensland to Victoria, giving us one of the most extensive supply networks in regional Australia. This reach lets us keep major projects, including Inland Rail, the Newell Highway upgrade, and renewable energy zones, supplied with consistent, high-quality materials for the full project lifecycle.

OUR PREMIUM QUARRY PRODUCTS

- Concrete Mixes [B80; AS1379 and Customer Specific]
- Manufactured and Natural Sands (including Thermal Sand)
- Concrete Aggregates
- Sealing Aggregates
- Roadbase: High-Spec, General, and Non-Spec Options
- Heavily and Lightly Bound Base
- TfNSW, TMR & VicRoads Specified Materials (e.g. SMZ, Zoned Fills)
- Drainage Rock
- Armour Rock
- Rail Ballast and Capping
- Select and General fills
- Ridge Gravel
- Gabion Rock: 100mm+
- High PI Roadbase: 20mm
- Non-Spec Roadbase: 20mm, 40mm
- Lightweight Scoria
- Decorative Aggregates (including river stone, 5mm–150mm)

CRUSHING & SCREENING

With a skilled team and a fleet of advanced machinery, we deliver quality products efficiently and reliably. Our ability to mobilise gives us the flexibility to meet each project's exact requirements—keeping projects moving on time and to spec.

We've built our reputation on doing the job right, supported by in-house maintenance capability and a versatile fleet supporting rock quarries, coal mines, and civil projects throughout eastern Australia.

OUR FIXED PLANT AND MOBILE CRUSHING EQUIPMENT

- Fixed crushing, screening & washing plant
- Closed-circuit electrical mobile crushing
- Closed-circuit fixed electric plant
- Jaw, cone, impactor & stacker crushers
- Precision pugmill
- Screening plant

TRANSPORT

Our end-to-end supply chain includes safe, proven transport solutions direct to site. Because we own the process from quarry to delivery, you get a faster turnaround, reliable access to product, and clear cost and time benefits.

Our modern fleet of PBS-rated truck and dogs, backed by an experienced team of drivers and in-cab driver-fatigue monitoring technology, ensures material is delivered safely and on time, every time.

PRE-MIXED CONCRETE

Regional Group Australia supplies a complete range of general-use, decorative, and specialised mixes, including blends with supplementary materials tailored to each project's needs.

Our concrete is built to perform. With quality systems, a strong safety framework, and experienced operators, every pour is handled with precision and consistency. That's how we've earned our reputation for delivering right the first time, every time.

OUR CONCRETE PRODUCTS

We offer a wide range of concrete products and mix types, with the capability to design and deliver tailored solutions for each project. Direct supply from our quarries to our batching plants ensures quality control, flexibility, and greater choice of mixes.

Alongside high-performance options, we also provide decorative concretes for residential and commercial projects.

- TfNSW, VicRoads and TMR approved mixes
- Piling mixes, including self-compacting (SC)
- Shotcrete
- Various decorative solutions
- Lightweight concrete
- Lower-carbon mixes

CARBONCRETE

CarbonCrete™ is a greener concrete solution, cutting embodied carbon by up to 70% while maintaining the durability and strength of traditional mixes. Designed to support Green Star and Infrastructure Sustainability ratings, it drives down emissions without compromising quality.

With CarbonCrete™, you reduce environmental impact, deliver high performance, and help build a stronger, more sustainable Australia.

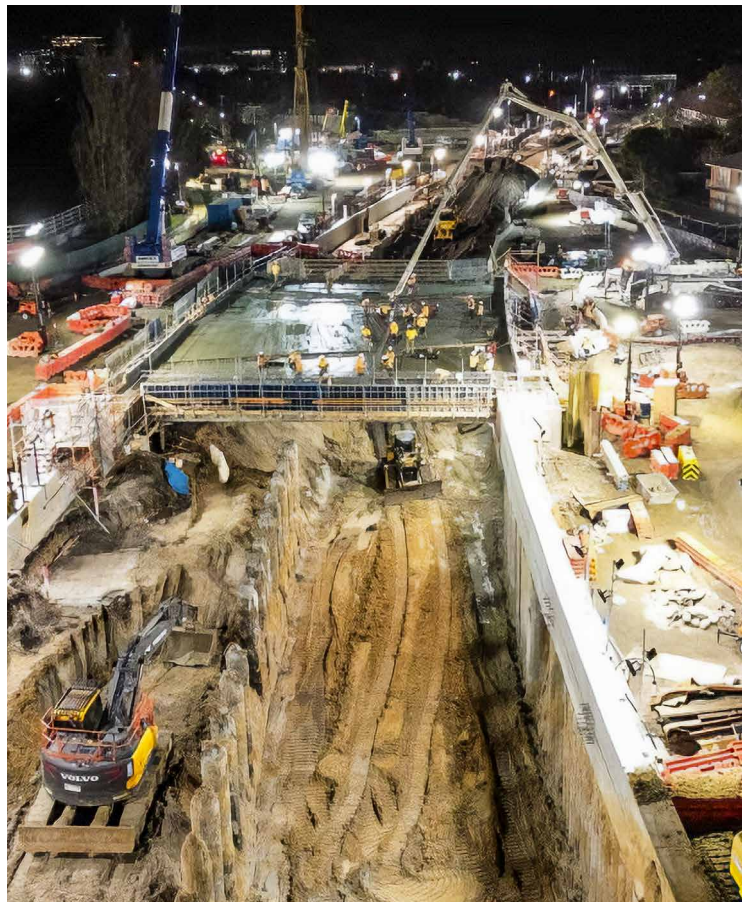

MOBILE BATCHING

Wherever you are in Australia, our mobile batching plants and supporting equipment bring the full operation to you. With the capability to run large-scale or remote projects end to end, we deliver mixes on site, including fly ash and slag blends. Built-in chilling systems maintain precise temperature control, ensuring consistent quality no matter the conditions.

NIGHT WORKS

When projects run after dark, so do we. Regional Group Australia offers reliable after-hours delivery to keep jobs moving beyond standard operating hours. Our experienced team works around your schedule to ensure you hit critical milestones without delay.

OUR PROJECTS

Regional Group Australia is trusted to supply tailored construction materials solutions in renewable energy, government, industrial, commercial, and residential sectors across the country.

- Level Crossing Removal Projects, across Melbourne VIC
- Tram Line Upgrades, Melbourne VIC
- Tamworth Regional Airport, NSW
- North West Cancer Centre, Tamworth NSW
- Split Rock Dam, NSW
- Shoalwater Bay Remediation Project, QLD
- Cargill Abattoirs, Tamworth NSW
- Taronga Western Plains Zoo Platypus Rescue HQ, Dubbo NSW
- Gumbuya World Theme Park, Tynong VIC
- Clarke Creek Wind Farm, Rockhampton QLD
- Singleton Bypass, NSW
- Mackenzie River Rail Formation Project, Central QLD
- Central-West Orana Renewable Energy Zone (REZ) transmission project, NSW
- Ellida Estate, Rockhampton QLD
- Hume Highway Oversize Overmass (OSOM) and Heavy Vehicle Rest Area, Menangle NSW

WAMBO WIND FARM'S TRUSTED PARTNER FOR CONSTRUCTION SUCCESS

Regional Group Australia was on the ground delivering mobile concrete supply at one of Queensland's largest renewable energy developments, Wambo Wind Farm. We supplied concrete for 83 turbine foundations using two on-site batching plants with a combined output of 130m³ per hour and a fleet of 20 twin-steer agitator trucks.

This operation kept concrete flowing to some of the largest turbine bases in Australia and played a key role in driving the state's renewable energy future.

QUALITY YOU CAN COUNT ON

At Regional Group Australia, quality is built into every step. From the rock we source to the equipment we run, the way we manage stockpiles, and our NATA-accredited testing, we deliver products and services that make your projects easier and more reliable.

Our management team brings deep expertise in operational excellence and quality systems. That commitment has put our materials into some of eastern Australia's most critical infrastructure builds, including the Newell Highway upgrades, the Fitzroy to Gladstone Pipeline, and Inland Rail.

We back this with a strong partnership with Macquarie Geotechnical, a trusted provider of geotechnical services and accredited testing. Together, we prove compliance at every stage to give our clients complete confidence.

All our quarry and concrete products meet or exceed Australian Standards and the requirements of local councils and state transport authorities. No matter the scale or complexity, Regional Group Australia stands behind the quality products we supply for your project.

SUSTAINABILITY

We take our responsibility to the environment seriously. We manage our footprint, limit impacts, and work with local communities to create lasting benefits in the places we call home.

Our Environmental Management Framework sets clear processes to ensure compliance, manage risk, and drive continuous improvement. In practice, this means monitoring site emissions and impacts, improving water efficiency, and developing lower-carbon product lines. Through our expanding recycling capability, we process concrete, asphalt, ballast, and other materials into new construction products, preserving natural resources and cutting waste.

At every level, we act with integrity to deliver a stronger, more sustainable future. We rehabilitate exhausted areas for productive use and use Environmental and Social Impact Assessments (ESIAs) to guide responsible decisions on new and developing sites.

HEALTH & SAFETY

At Regional Group Australia, protecting our people is at the heart of how we work, because everyone deserves to go home safely at the end of the day.

Our safety culture puts people first. We empower our teams to take ownership and focus on safe behaviours. This shows up in the small decisions we make, the conversations we have and the way we look out for the people around us.

We manage risk through clear standards, regular training, and a proactive approach to identifying and controlling hazards, including those affecting psychological wellbeing. Our WHS systems back this up, providing the structure for compliance, consistency, and continuous improvement across every site.

OUR PEOPLE

Our people drive everything we achieve. They're practical thinkers and problem-solvers who take ownership of projects and deliver smarter outcomes. Across operations, specialist roles, and business support, we bring the skills needed at every stage of the construction materials supply chain.

With decades of experience, our leadership team delivers confidence on projects ranging from major roads and bridgeworks to renewable energy and complex industrial builds. Grounded in technical know-how and a hands-on approach, they work side by side with clients to keep projects on track and deliver results built to last.

We back our workforce with professional development, training pathways, and leadership programs that build capability at every level. Diversity and inclusion are central to this commitment, ensuring our teams reflect the communities we serve and bring fresh perspectives to every challenge. United by trust, accountability, and support for each other, we move quickly, solve challenges together, and deliver on every promise.

COMMUNITY

The communities where we live and work matter to us, and we're committed to investing in their future. We back local organisations and initiatives through sponsorships, donations, and in-kind support.

WE'RE PROUD TO SUPPORT:

- **Dolly's Dream**—a national charity tackling bullying, anxiety, depression, and youth suicide
- **Little Wings**—a not-for-profit providing free, professional, safe flight and ground transport services for seriously ill children in rural and regional NSW, ACT and QLD
- **Ternary Group**—creating pathways to employment and long-term success by providing work experience and upskilling opportunities for Indigenous youth
- **Local community events, sporting groups, and initiatives**—including the Woori Yallock Football Netball Club, Inverell 17s Representative Netball, Kiama Sevens, and the Illawarra Convoy

OUR VALUES

LEADERSHIP & CANDOUR TEAMWORK & OWNERSHIP TRUST & COMMITMENT

We deliver with confidence. By communicating openly and working together to keep things moving, we're able to follow through on what we promise. Our shared values are the foundation of how we work, enabling us to build strong teams, trusted partnerships, and create real impact in our communities.
