Smarter Looking Lawn

At Termiturf, we are committed to offering high quality artificial lawns that cater to the unique challenges of Australia's harsh environment. As the world's driest inhabited continent, Australia faces increasing water scarcity and rising costs. Fortunately, we provide an effective alternative to help you maintain a vibrant home and lawn throughout the year.

WHY CHOOSE TERMITURF ARTIFICIAL LAWN?

Termiturf artificial lawn provides a range of benefits beyond just aesthetics. It will save you time, money and water, while ensuring your home and garden maintains a healthy green appearance.

With minimal maintenance required, artificial lawn eliminates the need for mowing, edging and weeding. You'll get your weekends back.

It's budget friendly, saving you money over the long term. Say goodbye to paying for fertilisers, professional lawn care services and expensive water bills.

In addition to the rising cost of water, annual water restrictions can make it challenging to keep a real lawn looking its best across all seasons. Artificial grass helps you conserve this valuable resource.

Our artificial lawns are not only a perfect solution for residential areas but also commercial properties and public spaces.

Termiturf is available for purchase from selected distributors for DIY enthusiasts, or we can arrange a hassle-free installation through our network of professional turf installers.

**conditions apply*

Artificial grass engineered for Australian conditions

Termiturf artificial grass is precision engineered to mimic the appearance and texture of the real thing.

Made from high-quality materials, our synthetic turf solutions are durable enough to withstand Australia's harsh and hot summers without suffering from premature fading, and they feature a unique dry-grass weave for enhanced realism.

The appearance, colour, and texture of new-generation yarns of artificial grass have become so realistic that many people now can't tell the difference, building acceptance for everyday use.

Check your neighbour's lawn, you might be surprised!

OUR PREMIUM TURF STYLES

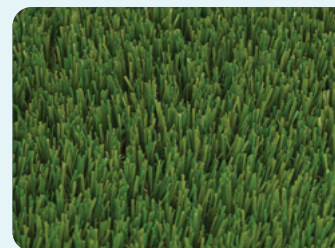

Our lawn styles enhance the appearance and usability of many different spaces, from large public sporting grounds to compact backyards, pools, balconies, and more.

We offer rolls in 2m and 4m widths, reducing the number of joins required, making installation easy.

Each style has unique characteristics, including blade colour, density, dry weave thatching, height and width to suit your project. In addition, Termiturf artificial lawn is backed by an incredible 10 year warranty*.

THE TOORAK

This exclusive turf sits naturally in our leafy established suburbs. With its fine leaf 40mm blades and rich green hue, it will require close inspection from your neighbours to distinguish it from the real thing.

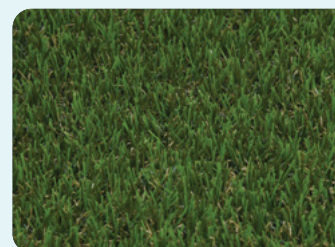

THE WAYVILLE

For those who take pride in their homes and appreciate the look of a beautifully manicured lawn, this option is perfect for you. The slightly shorter 35mm blade length brings that neat, tidy, freshly mowed appearance to your home without any of the hard work.

THE LIFESTYLE

Perfect for any outdoor space, this short 25mm blade turf is a practical solution for families with children and pets. As an all-rounder, the Lifestyle is a good choice for pool surrounds, balconies and other high traffic areas, yet still delivers that lush green look regardless of the season.

PUTTING TURF

Mimic the feeling of being on your favourite course with our low profile, high density putting turf. It can be customised to suit any backyard or space and requires very minimal maintenance. Bring the golf course home and shave several strokes off your next round.
