# Termidry - your waterproofing solution

Working closely with the building industry for more than 30 years, Termidry has become the preferred waterproofing partner of builders across Australia. Our teams apply internal, external and below-ground waterproofing systems to both residential and commercial projects, with applications that meet or exceed the performance requirements of the 2022 National Construction Code. The collective knowledge and experience of our people give clients the assurance that every application will render long-term performance and meet compliance requirements.

Part of the Termi Home & Commercial group, Termidry is supported by a national network of service centres that also deliver pre-construction and post-construction solutions in termite management, pest control, epoxy flooring and artificial turf. Speak with our team to find out more about these solutions.

## INTERNAL APPLICATIONS

Termidry provides waterproofing applications to a range of internal areas with membranes designed for the intended flooring including tiled finishes or screeds. For tiled finished flooring, selected membranes provide a rough keyed finish to enable a secure bond.

Internal applications receive:

- Thorough substrate cleaning and preparation, including the removal of lumps and dags from walls and floors
- Quality bond breaker sealant applied to all joints, junctions and penetrations
- Relevant areas taped off prior to application
- Application of a primer coat followed by Class III waterproofing membrane to appropriate heights
- When contracted, finishing silicone applied to benchtops, baths and tiled areas to create a consistently even and seamless finish

# WORKING WITH TERMIDRY

- Workmanship and materials covered by our industry-leading residential warranty\*
- Full compliance with the National Construction Code, with our applications meeting or exceeding performance requirements
- Documentation provided for OHS and building regulations compliance
- Detailed installation certificates issued
- Certificate III trained applicators and/or supervisors.
- Dedicated scheduling teams to accommodate project deadlines
- Preferred applicator status with several leading waterproofing product suppliers

## EXTERNAL APPLICATIONS

Termidry provides waterproofing application to a range of external areas, including balconies, roof gardens, terraces, planter boxes and ponds. These applications require scoping by our team before commencement, as several design and environmental factors could affect the performance of the membrane.

Key factors include:

- Building design
- Type of topping
- Estimated traffic
- Product UV stability

## BELOW-GROUND APPLICATIONS

Termidry provides waterproofing applications to below-ground areas, including retaining walls, water tanks, car parks, basements and sewerage tanks. These applications require careful scoping before commencement, as hydrostatic pressure, soil movement and moisture ingress need consideration.

## Quality and Compliance

Every waterproofing application from Termidry follows strict operational procedures to ensure compliance with product specifications and our own performance requirements that meet or exceed those of the 2022 National Construction Code.

Each application is carried out by a trained applicator using products from accredited manufacturers. Together, these measures ensure every installation delivers maximum waterproofing performance while meeting all compliance requirements.

## Termidry Residential Warranty

The Termidry Residential Warranty provides new homeowners with support in the unlikely event of a waterproofing failure. The warranty covers water ingress that is directly a result of faulty workmanship or material failure and applies to both internal and external applications.\*

The warranty term covers the builder's statutory liability period in all states of Australia and does not require the homeowner to have ongoing checks or assessments to remain valid.

For more information, read our Termidry Residential Warranty flyer and our Termidry Care and Maintenance brochure.
