

# Prompt Procedure

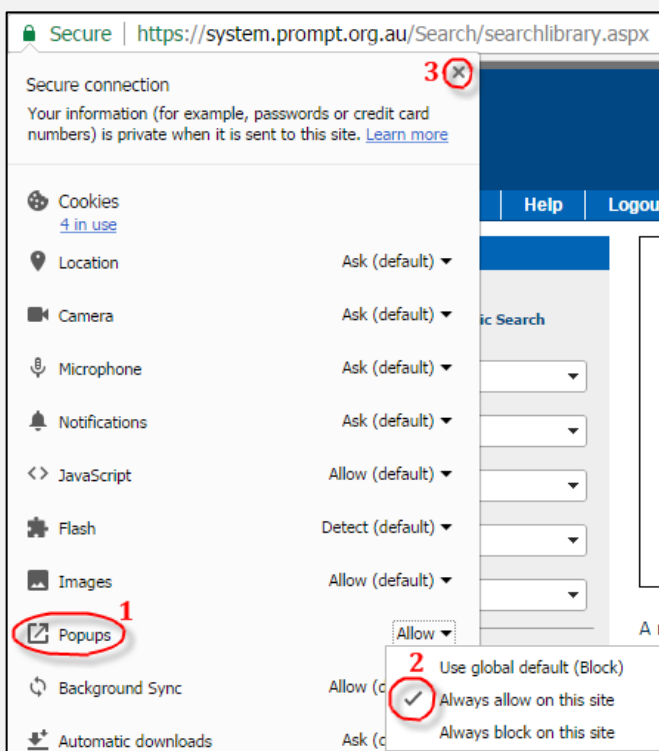

## Procedure for changing Google Chrome settings to enhance Prompt experience.

### 1. Enable pop-ups

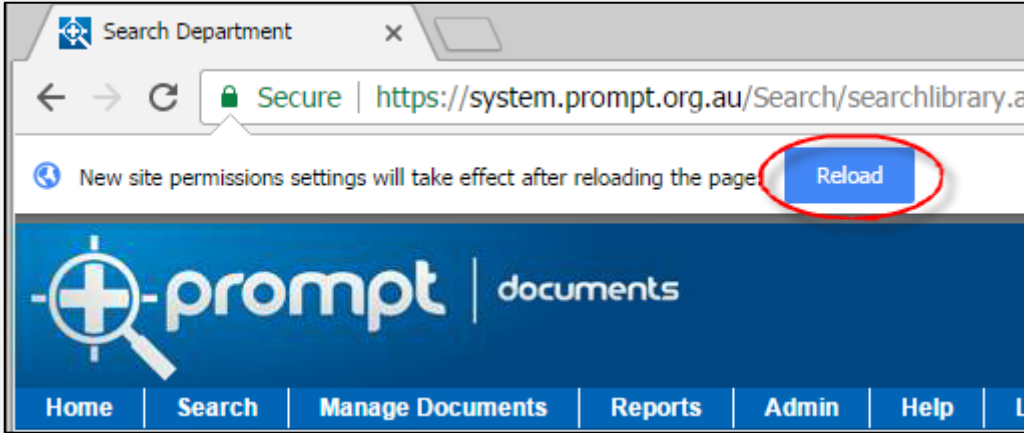

When you are logged into the Master Server (system.prompt.org.au) you will see the following screen:

Click on the secure button (encircled in Red). This will pop-up the following box:

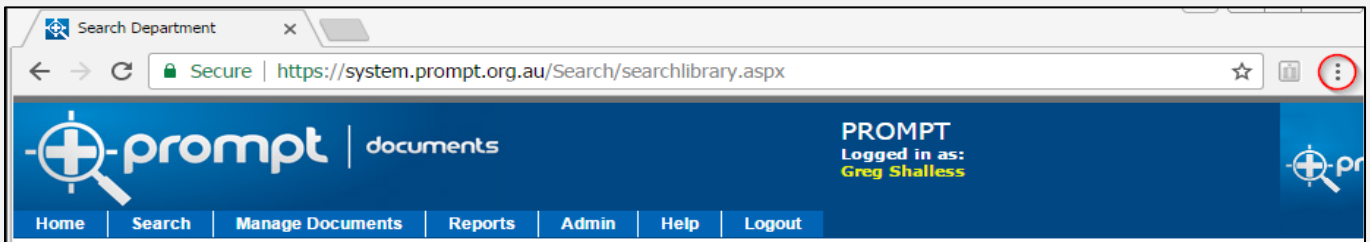

Click Popups (1) and Tick “Always allow on this site” (2), then close the popped up box (3), were you will probably get this screen.

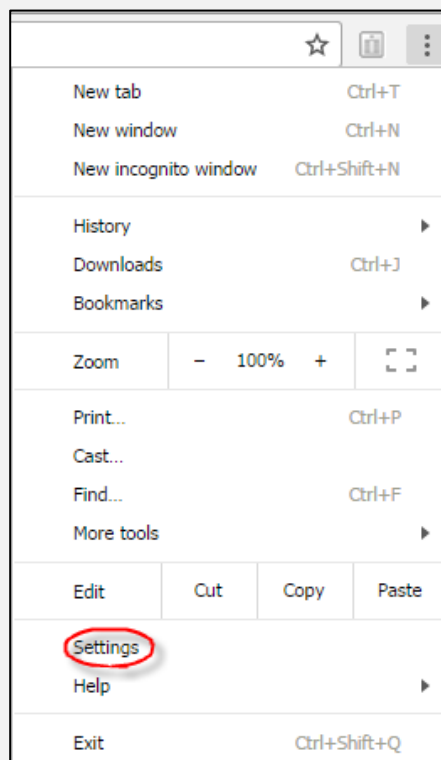

If so click Reload and step 1 is done.

## 2. Get correct Language Setting

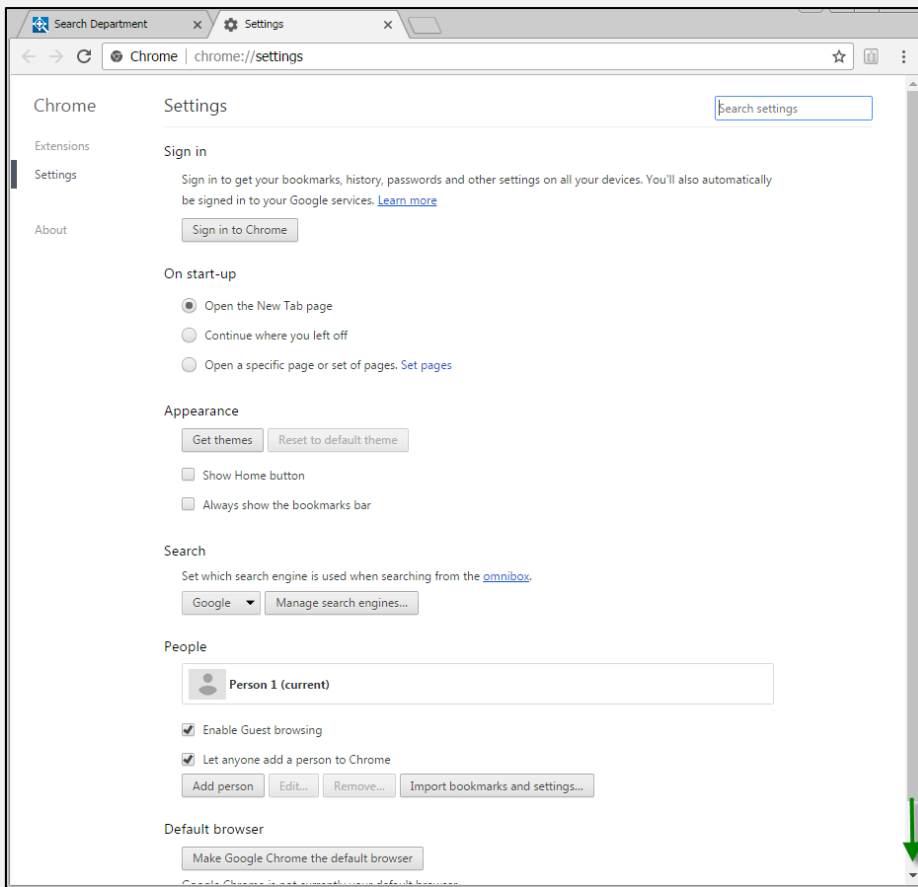

Click on the 3 dots to the right (encircled in Red)

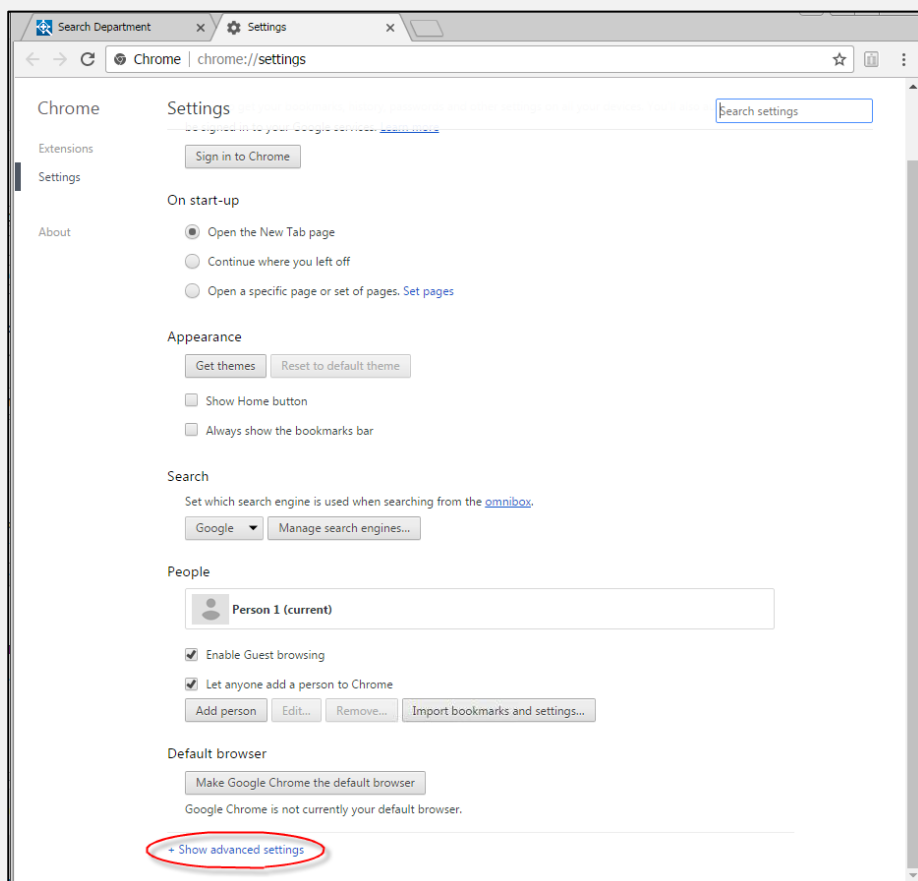

This will pop up the following box, click “Settings” (encircled in Red):

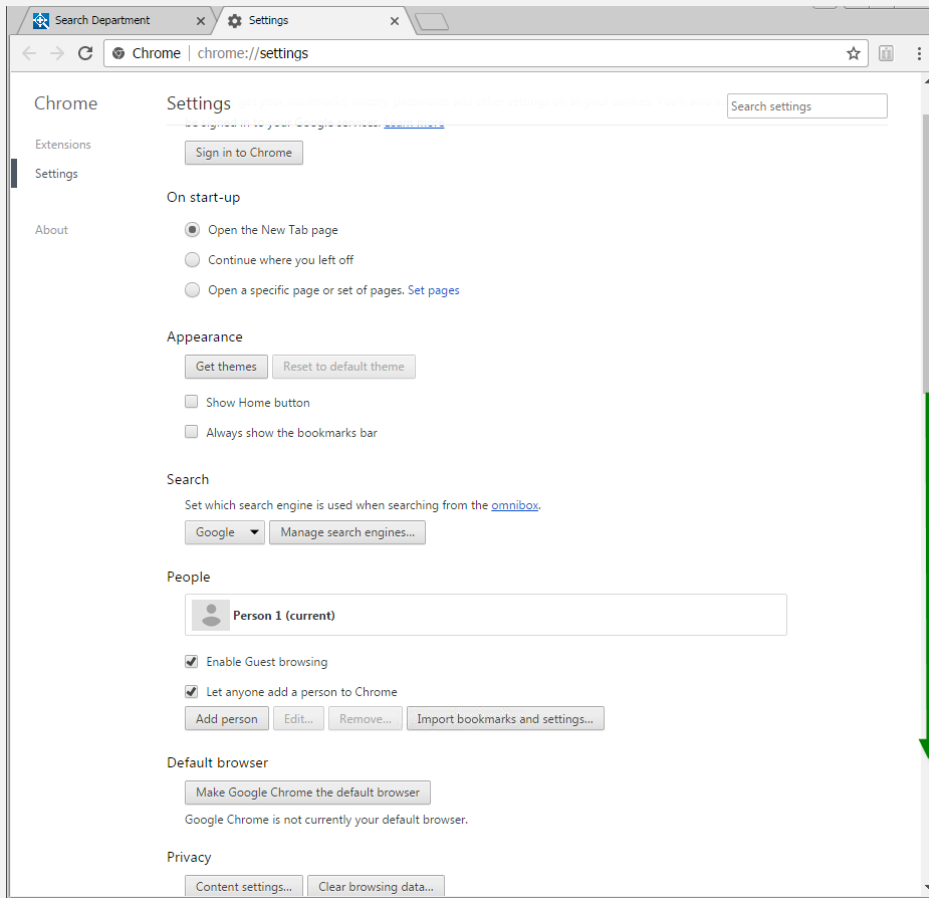

This will open a new Tab, which you will need to scroll down (Green arrow) until you

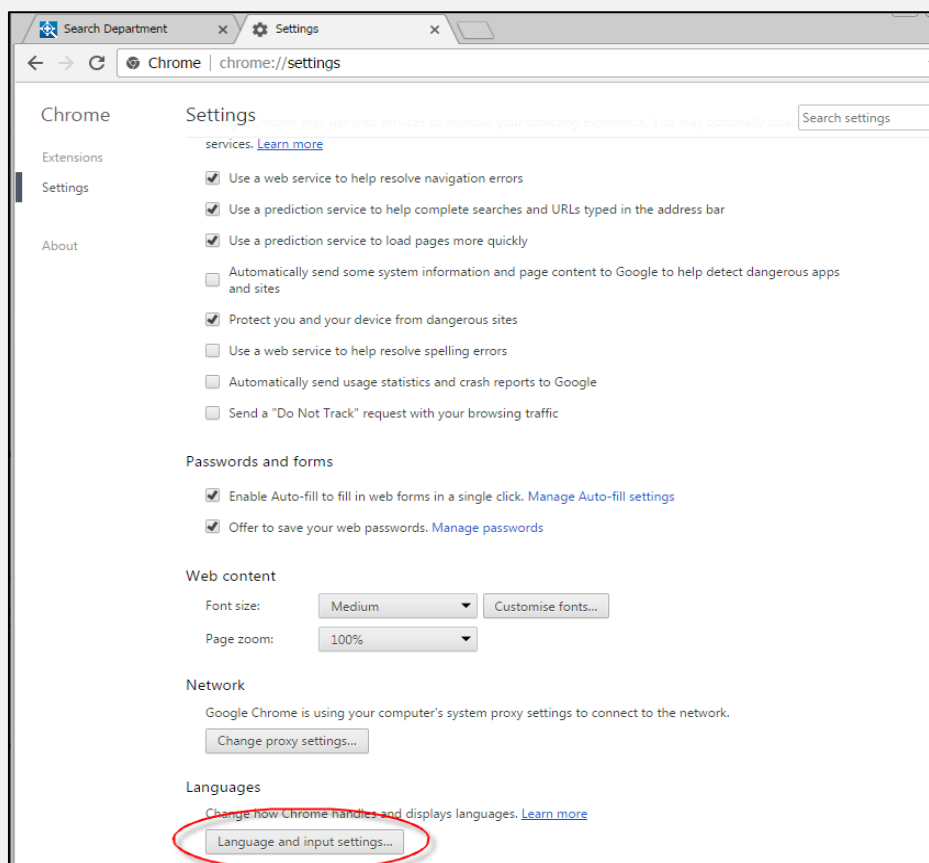

Which you should then click (encircled in Red)

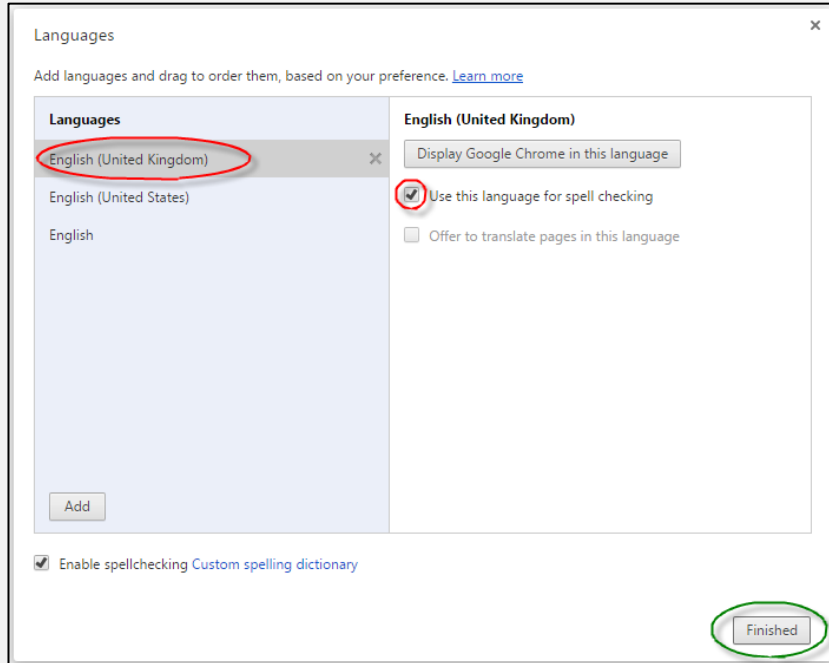

Which you should further scroll down (Green arrow) until you find “Languages”:

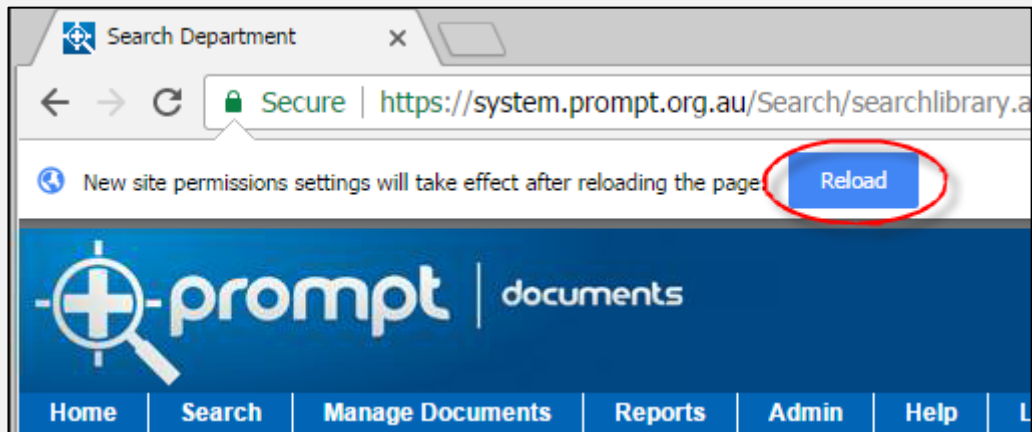

Where you should click on the “Languages and input settings...” button (encircled in Red):

Where you need to ensure that either English (United Kingdom) or English (Australia) is top of your list and has “Use this language for spell checking” is ticked. If you have English (United States) top of your list, you will have issues entering dates in Prompt.

Then click Finished where you will probably get the Reload screen again:

If so click Reload and step 2 is done.
