

Create your own Story Cubes

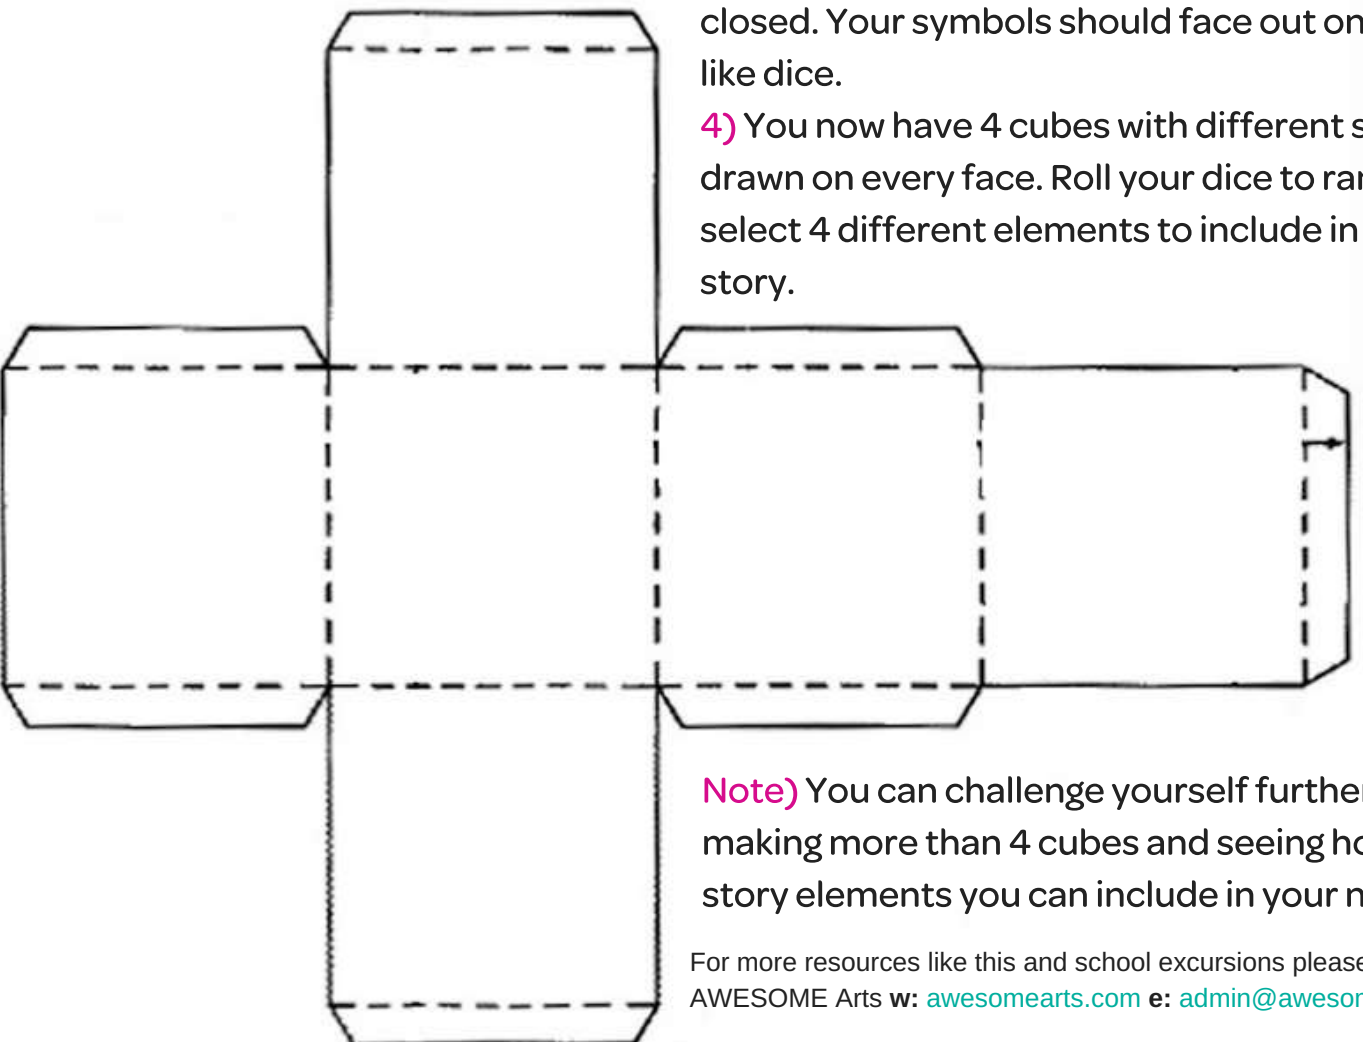

1) Copy 4 story cube templates and cut out along the straight lines (You can simplify this activity by separating into a group of 4 and making once dice each)

2) Select your favourite 24 Story cube symbols from your completed worksheet and draw them on the faces of your 4 cube templates.

3) Fold along the dotted lines and glue your flaps closed. Your symbols should face out on the cubes like dice.

4) You now have 4 cubes with different symbols drawn on every face. Roll your dice to randomly select 4 different elements to include in your story.

Note) You can challenge yourself further by making more than 4 cubes and seeing how many story elements you can include in your narrative.

Here are some example symbols to get your story cubes started.

Can you think of any additional symbols to provide inspiration for a story?

Draw your ideas in the blank boxes below.
