

Cyber Security Compliance & Procurement

Cyber security is becoming more important for large and small business alike. It is also a valuable tool for small businesses to win big opportunities, but only for those who know how to demonstrate their security maturity to outsiders.

This Workshop will teach participants how typical cyber security procurement processes progress, what they need to have in place to pass, and how they can use security to improve their bottom line.

The workshop will cover the following topics

- The cyber security procurement process.
- The value and cost of industry accreditation.
- A mental model for managing cyber risk.
- How to respond to cyber security questionnaires and demonstrate security.
- Tools and service to help.
- Please bring your own laptop to the workshop

When 26 April
Time 10am – 12pm

Meet your Learning Specialists

SUSIE JONES
CO-FOUNDER & CEO
CYNCH SECURITY

ADAM SELWOOD
CO-FOUNDER & CTO
CYNCH SECURITY

Cynch Security has vast experience developing and delivering interactive and productive workshops including the provision of training sessions to those without technology backgrounds. Their sessions are designed to make cyber security easier to understand and implement for SMEs.

Susie is an experienced leader and risk manager who spent years specialising in the people and process elements of general and cyber risk management, as well as corporate insurance requirements.

Adam is passionate about using his expertise to help SMBs that have nowhere else to turn. Extensively experienced in solving enterprise technology and cyber security problems, prior to founding Cynch Security, Adam led Cyber Resilience initiatives within Australia Post.
