

CDi-L COIN DEPOSIT SOLUTION

Our CDi Coin Deposit Solutions are self-service bulk deposit devices that allow Retail Customers - and coin-positive Business Users - to bring in their excess coins, pour them into the machine and receive a voucher to the amount deposited to redeem at the counter, or a receipt of the amount being credited directly in their bank account.

Our CDi solutions help Banks dramatically cut down on time and costs associated with receiving, counting, storing and processing coin deposits over the counter and in the back-office. With a 99,98% accuracy against counterfeits and miscounting, and by logging each transaction in detail, they also enable full visibility and control over deposited coins, across the network and at all times.

Designed to occupy minimal floorspace and allow a plug 'n' play installation, the CDi-L is the perfect solution for smaller locations, pilots and testing sites.

BENEFITS

- **OFFER A QUICK AND SMOOTH EXPERIENCE TO YOUR CUSTOMERS**
A deposit transaction only takes a couple of minutes to complete and the count is automated and 99,9% accurate.
- **REDUCE CIT PICK UPS**
With a capacity of up to 70,000 mixed coins, the CDi-L allows CIT operators to quickly pick-up its contents in a secure coin trolley, reducing the amount and length of visits.
- **LOW COST OF OWNERSHIP**
With a small footprint, low cost operation and minimal maintenance required, the CDi-L solution allows to significantly reduce your operational costs while offering your personal and business customers a valued service that listens to their everyday needs.

also available as

CDi In-The-Wall

PROCESS

- 1. VERIFICATION** (optional) - The user verifies their account by inserting a valid account card in the card reader or by entering their account number and sort code via touchscreen or keypad
- 2. DEPOSIT** - The user places the coins on the conveyor, making sure no foreign objects are fed into the processing mechanism, then initiates count
- 3. COUNT** - The machine counts the deposit, rejecting any damaged or foreign coins. At the end of the operation, the CDi-L will prompt the user to continue the deposit or confirm the transaction is complete
- 4. ACKNOWLEDGMENT** - The machine will provide a unique receipt recording account ID, time stamp and amounts deposited by denomination.
