

BCi-L Business Change Solution (Lobby)

Our BCi Business Change Solution is self-service change dispensing device allowing commercial customers to 'buy change' in the form of rolled and loose coins, and small denomination banknotes, by paying-in high-value banknotes or on their account credit via bank card.

Tried and tested by banks all around the world, often as a chargeable service, our BCi range automates and simplifies one of the most time-consuming but essential services that business customers require. Users no longer have to queue up at the counter and order their change in advance; our BCi solution allows them to simply go to the machine and quickly pick up the change mix they need at their convenience.

Branch Staff are no longer required to prepare change orders, serve at the counter, or process paperwork. The BCi allows them to focus on high-value generating tasks, and it is ideal for unmanned sites like retail/remote locations, banking hubs and branches.

APPLICATIONS

BANKING - Banks around the world have deployed the BCi to reduce wait times for commercial customers and to automate their coin management/change dispensing transactions, migrating them to a self-service device.

CIT - Cash Management providers install the BCi in shopping centers or high-street locations to facilitate their business customers throughout their business hours.

RETAIL - Tier 1 Retailers use our BCi solution to automate and/or extend the cash office/change managing function beyond their normal office hours.

also available as

BCi-6 - ITW 6 SILOS

BCi-8 - ITW 8 SILOS

PROCESS

- 1. VERIFICATION** - The user goes to the BCI and verifies their account by inserting a valid account card in the card reader or by entering their account number and sort code via touchscreen or keypad
- 2. EXCHANGE** - The user enters the amount of change they require by denomination and then feeds a banknote into the validator or selects the bank account to withdraw the amount from (online option)
- 3. DISPENSE** - The machine dispenses the exact amount in rolled coins, plus optional dispense of loose coins and small denomination banknotes
- 4. ACKNOWLEDGMENT** - The machine provides a unique receipt of the transaction, recording account ID, time stamp and exact amounts.

BENEFITS

- OFFER A QUICK AND SMOOTH EXPERIENCE TO YOUR CUSTOMERS**
No need to pre-order change in advance or queue up at the counter. Retailers use the BCI as a business-dedicated ATM or change machine.
- AUTOMATION OF CASH AND ADMIN HEAVY TRANSACTIONS**
With all cash-heavy transactions migrated to the self-service wall, staff can be redirected to customer service and consultative roles.
- CONVENIENT AND SECURE CHANGE DISPENSING**
Installed in-branch or through the wall, the BCI solution gives commercial customers the change they need daily, quickly and conveniently.
- LOW COST OF OWNERSHIP**
With a small footprint, swift operation and minimal maintenance required, the BCI solution significantly reduces your operational costs, especially as part of an overall branch rationalisation or leave-behind strategy.
