Our Reduced Packaging Update

An environmental change for the better

Fashion Biz aims to change the culture of its business to design more sustainable packaging, increase recycling rates and minimise packaging consumption to reduce our environmental impact.

We continue to review all our plastic packaging procedures to reduce, reuse or recycle wherever we possibly can. We are committed to not only reducing the amount of packaging we use but ensuring that it is sustainably sourced and recyclable – in short, we take our product stewardship seriously.

Following on from some initial packaging reductions made in late 2019 and throughout 2020, we are now taking further steps to reduce, reuse or recycle wherever we possibly can, and you will see these changes across more product lines in the future.

Some of the changes you can expect to see are:

**More garments being sent
bulk packed or without a
plastic bag altogether**

**A reduction in
individual packaging
size and/or weight**

**Removal of excess
packaging such as ribbons,
clips and collar stays**

**A move towards using
either recycled or
bio-degradable plastics**

These Biz Collection styles are part of our current bulk packaging trial:

Based on the success of our Biz Collection bulk packaging trial we have now rolled out this trial across Biz Corporates and Syzmik.

All other Biz Corporates shirt styles are being transitioned to reduced packaging and these changes will be applied with future orders.

We're pleased to say that over the next 12 months we expect to see a 20% reduction in plastic consumption across our business as a direct result of this trial.

Other changes you'll see:

- Our Poly bags have been changed to LDPE4 (commercially recyclable only) for three of our brands – Biz Collection, Biz Corporates and Syzmik and we have taken delivery of stock in these new bags from most suppliers already.
- Biz Care poly bags are made of bio-degradable material (containing plant enzymes) so will decompose naturally. These can be recycled by households.
- You'll notice that selected Men's shirts have reduced packaging materials – no plastic collar stand/ butterfly and minimal number of plastic clips being used. This is being trialled currently by one of our main suppliers and we'll monitor any impact on the garments that may occur during transit.
- Some Ladies styles will have back boards removed and a minimal number of clips used to hold the shirt in place. This is being trialled currently by one of our main suppliers and we'll monitor any impact on the garments that may occur during transit.

OCTOBER 2022

- Solid dark coloured polos and tees for Biz Collection like CREW, SPRINT, PROFILE will be bulk packed in printer's fold – approx. 10 pcs packed together in a master poly bag.
- Solid dark coloured jackets for Biz Collection like APEX, SUMMIT, GENEVA will also be shipped in bulk packs so you can expect to receive these without poly bags now.
- Solid coloured Aprons are now available in bulk packing.

We continue to review all our plastic packaging procedures to reduce, reuse or recycle wherever we possibly can. We value your feedback so please let us know how the reduction in packaging is working for you and highlight any issues especially related to garment presentation in transit.

**We are making it a priority to change our product life cycle for the better.
That means growing a better future for both our customers and the planet.**
