Data Analyst

- **Make an important contribution to the health of children through medical research**
- **Work with one of Australia's most respected national and independent medical research institutes**
- **Located in Westmead, one of Sydney's and Australia's major biomedical research hub**
- **Competitive salary offered. Includes salary packaging benefits only available to Australian not-for-profit employees**

Children's Medical Research Institute (CMRI) was Australia's first dedicated paediatric research facility and is now one of the world's most highly regarded independent medical research centres. Our research focuses on the areas of embryonic development and birth defects, cancer, neuroscience and gene therapy and we have a strong international reputation based on our research outcomes. It is also home to the world-first proteomics project, ProCan, which is changing the way cancer is diagnosed and treated. CMRI's research programs are supported by state-of-the-art facilities and committed research and support staff. Our achievements are made possible by a loyal network of community supporters, highly engaged donors and the very successful Jeans for Genes® fundraising campaign.

We are seeking a Data analyst with 3 years +/- experience to join our dynamic fundraising team which plays a critical role helping CMRI deliver world beating research.

Apply your data skills to;
- Deliver compelling performance reports on CMRI's fundraising campaigns and activities
- Profile and segment our database of donors to optimize fundraising returns and enable tailored communications
- Promote evidence-based decision making in the planning and review of campaigns
- Design and carry out A/B experiments to catalyze continuous improvement
- Work with leading third-party data science consultants and tools to integrate machine learning insights and further boost fundraising success
- Champion the benefits of excellent data practices, persuasively embody these practices, and engender support for improved data practices across the fundraising team.

Key tools include:
- Salesforce
- Microsoft SQL Server
- Excel
- Dataro.io

- PowerBi

Experience with all these specific tools is not essential. We feel if you have the requisite data intelligence and capabilities, plus experience with similar tools, you will be able to quickly add-value with CMRI's contemporary data toolset.

Your CV and covering letter should begin to describe examples where you have applied a can-do attitude, clear communication and stakeholder engagement, your skills, and various toolsets to deliver positive data and organisational outcomes within a team environment.

You will report to your data compatriot, the Manager – Data Analytics and Strategic Insights within a flat, open and fun-loving fundraising team. There are ample opportunities to engage with and get exposed to senior stakeholders, to strategic challenges and exciting projects for the right candidate. We want to develop and grow together, so we regularly discuss and alter the way work is done and shared to maximise learning opportunities.

You will be provided with a competitive remuneration package in accordance with qualifications and experience. Additional benefits include the provision of a Public Benevolent Institution salary packaging scheme and participation in an employer-contributed superannuation fund.

Applications should include a cover letter (citing **PV2114**), curriculum vitae and contact details (phone/email) of three professional referees and be forwarded to recruitment@cmri.org.au

Closing date for applications is **30th April 2021.**

Please direct enquiries regarding the position to Neil Cunningham, Manager – Data Analytics and Strategic Insights. Email: ncunningham@cmri.org.au
