Subject: Support for the CBD urban renewal strategy

Hi There,

I would like to express my support for the Newcastle CBD urban renewal strategy an in-particular its approach to improving access to between the city and the harbour.

I am looking forward to seeing more detail on the new transport network and how buses can infiltrate and connect parts of the city which are currently poorly serviced or not serviced at all.

I'd also like to see an investigation into funding models which could support more frequent services making the bus travel more convenient and attractive in comparison.

Thanks

Jeremy Amann
