Subject: Fwd: Revitalisation of Newcastle
Attachments: Revitalisation of Newcastle

I have lived in Newcastle all my life and may I say that I grew up in one of the worst parts of Newcastle, called Tighes Hill. I am very passionate about what is going on in Newcastle.

In the past there has NEVER been any concern of the coal dust coating all our houses. There has never been any concern about the EXTREME noise of the coal trains traveling past our houses day and night.

But yet because there is a buck to be made by ALL THE RICH PEOPLE AND RICH COMPANIES, there seems to be masses and masses of discussion about REVITALISATION. What joke. People and companies want to come in make as much money as they can and leave back to where they came from. WHAT ABOUT GIVING THE WORK TO COMPANY'S LIKE MINE. That live here and will stay here forever. Smaller companies, not the big fat cats who already are rich and then will screw the little companies to do the work for nothing.

We have a man who lives in Green Point as Mayor all of a sudden, he is a local? A man who owns and has assets and connections with the builders who will probably get the work to REVITALISE. Watch this space.

Can I ask why there is SO much useless money spent on discussion and NO action. If the money already spent on discussion and finding useless jobs for all these fat cat government officials was actually spend on providing infrastructure we would be half way there. could have done little bits at a time.

Unfortunately, where there is money there is greed, and everyone wants to be involved. Rats in a barrel.

There will be more money spent, no action, if there is action, it will be over budget, the city will be in debt, the builders will make their money, leave the city, only rich people will live in the city and the rest of us will have to be moved out.

I am sorry to have such a negative but realistic expectation of your planning.

Regards
