Further to my emails of yesterday and today, there is an additional important reason why rail services must be continued to Newcastle Station.

The Newcastle Urban Renewal Strategy envisages 10000 additional jobs and 6000 additional dwellings in Newcastle City Centre by 2036.

The additional people generated will need to get in and out of the City Centre and rail is the best people mover by far.

We should be grateful if this could be included with Hunter Transport for Business Development's Submission to the Urban Renewal Strategy forwarded on 17th April 2013.
