Newcastle station and the line to Newcastle Is very important to Newcastle It has many days when it is busy and like all places when its slow days too . But a good Public transport is the responsibility of the government for it people - not for money - a Good transport in a area - It stimulates the economy and Growth , makes tourism possible -and the general public coming in to town which stimulates the economy !

It also allows Access for all people to the beaches and to Newcastle its self - weather they be young old handicapped - mothers with prams and lots of children and bags. surfers with boards - people with luggage all people that come to Newcastle and the greater hunter valley !

It gets silly to fix what is not broke - Newcastle really needs its rail service for the future .

It already goes into town - were mother with prams and bags and children can get off and have a nice day - with our struggling to change from one form of transport to another - or having to wait with children for the next form of transport to get in to ton to go to the beach - or town or what ever ! and its the same for other disabled people changing form one form to another with chairs or being blind or with gear to get into town - then they may

have to wait both day and night (1-2-3-4am too) - when
 dose the other for of transport stop - if people are left
 waiting at night after traveling back from Sydney will their
 be a service to join up - so people are not left in danger
 waiting at night - and will it be reliable - what if the other
 service is late will their be a long wait for another
 transport connection

The train service already smoothly goes in to Newcastle - so
 people don't have to wait and worry about connections - or
 waiting a lone at night in the dark . in danger -

If you make Newcastle Unappealing people wont come to
 Newcastle - the university wants to bring more students
 to Newcastle but if their is No good public system - like we
 already have at the moment - (the train service that goes
 to Newcastle station)

The people that have to come in to town will start bring in
 more and more cars - so congestion the roads in town -
 and make more problems with parking in Newcastle .

Newcastle Need it rail system to Newcastle station for so
 many many reasons - please don't destroy Newcastle and it
 great rail system thank you Mel James 08 -02 -2013 -
 A Newcastle legend who really loves and cares a bout
 newcastle -please save our rail in newcastle ! - thousands of
 Newcastle people want it saved . please save It ! thank you
