Dear Sir,

I must tell you the car gives you a sense of independence, being able to put everything in it, and go whenever.

The car is the ruination of our Public transport system, dangerous, very expensive, too slow, anti local, and cheap for the Government.

I travel from Dungog to Newcastle twice a week and once every three weeks Central to Newcastle, with bags, and various items, on the train.

I do not want my journey broken and have to get into a bus.

Buses do not wait for trains.

Yours faithfully,

Bruce Williams.
