---

To whom it may concern,

We have located the property of South Tahara Park on maps 13 & 14 of the Biophysical Strategic Agricultural Land Mapping Exhibition. Please note that not all portions of the property were captured in the mapping data. The areas that have been excluded is our primary cropping and pasture areas. These parcels are highly developed with irrigation systems and pasture control. That the land is a large aggregation that operates as a single unit of cattle and lamb breeding and fattening enterprise producing prime beef and prime spring lamb. Therefore it is essential the whole of the land is treated as one parcel and included in the BSAL category.

Listed below are the lot & DP numbers of South Tahara Park;

- Lot 1, 2 and 4 – DP 551676
- Lot 2 and 3 – DP 564588
