Subject: Submission re Mining amendments

Dear Sir/Madam,

I am writing in response to the proposed changes to the State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries)

Having felt extremely vulnerable due to the possible impacts the now withdrawn Coalpac Consolidation Project would have had on the town I grew up in (Cullen Bullen), I welcome any move by government departments to set buffer zones to protect the residents which may be impacted by extractive industries.

I understand the importance extractive industries play in Australia but question the balance we currently have between the concerns of residents and the demands of industry.

Thank you for your time in reading this submission.

Kind regards
Eva Rizana
