

4th November 2013

To whom it may concern,

I wish to ask the state to recognize all of the Shoalhaven Category 1-3 agricultural land instead of the small amount of land it currently does regarding amendments to CSG Mining.

I am also appalled by the mere two kilometer buffer zones; this is not nearly enough for any populated area.

Being a mother I want a safer future for my son and future grandchildren to grow up in than what's on offer now. I want them to have the opportunity to have safe clean water and healthy soil to grow fruit and vegetables in. I would much rather see renewable energy rolled out that harms none and doesn't add to climate change like Coal Seam Gas Mining does.

Yours Sincerely

Chrystal Kahler
