Subject: No Gasfield in Byron Shire

Dear Sir

Please see attached photo which represents the results of a house to house survey conducted by volunteers in Brunswick Heads. As you can see 93% of residents want the area to remain Gasfield Free. 3% voted in favour of a gasfield and the remaining 4% were undecided.

This is a resounding statement from the residents of Brunswick Heads, Byron Shire. In a democracy that sort of percentage must surely be listened to. I expect you will extend that courtesy to these residents and all communities which have had similarly high percentages of people wanted to remain Gasfield Free, whether in a town or country area.

Please represent your constituencies by listening to them and do not support the mining industry which threatens to turn our beautiful homeland into an industrial wasteland. Allow our children and their children to live with clean air and water, which we were lucky enough to be brought up with.

Yours sincerely
Wendy Royston
