Comment: I am NOT in favour of the LEP in its current from, The fact of the matter is that the Sutherland Shire is already overpopulated, with traffic congestion in my opinion the worst in the state, the current roads and infrastructure are no where near what they need to be if more high density dwellings are to be built, and this is without the Greenhills development, the sharks development, Caringbah high school development and the Kirrawee brick pit development, once all these are built it will add thousands of more cars to already chocked roadways leading people to drive through the maze of back streets ultimately endangering pedestrians. I understand the need for more dwellings in Sydney but does this need come at the cost of peoples life styles and safety, I invite any panel member to come down to my place in Cronulla at any given day and show just how backed up the roadways are, if the infrastructure was there then more dwellings would not be a problem but its not and does not even come close to even handling the current flow of traffic. This LEP was written by a man and his staff that have been corrupted by Developers want and needs with no thought to how it will effect rate paying residents that was for all to see when the mayoral minute was pushed through, it was quite disgusting to see, the LEP should be totally scraped and started again with 100% community consultation. Thank you cm
