Comment: I fully support retention of boat sheds and boathouses along Shire waterways. They are an integral part of our cultural heritage and local history , form natural havens for fish and other sea life add character to our waterways and should be retained. I also fully support higher density housing - for too long has our Shire been starved of development by dinosaur members of Council and some local armchair politicians. I think the proposed LEP is reasonable and well considered. It is imperative that we consider and address the needs of the population - young and old and create housing not restrict or destroy. Reasonable increases in density and sensible reduction in mandatory landscaped areas will create more affordable housing for our children , address the needs of the ageing population and importantly be both environmentally sustainable and user friendly.
