

East and West facing apartments that overheat

How long have you lived in your apartment	Do you rent or own?	How old is your apartment building? (SEPP 65 has been in operation since 2002 and this question is to understand if your building would have had to comply with this regulation).	How many bedrooms does your apartment have?	What level of your building is your apartment on? (0=Ground Floor, 1=The first level above ground floor, etc.)	What way does your living area face? (Hint: you can use the compass on your phone to check)	Is your apartment cross-ventilated? (Does it have windows on opposite sides of the apartment)	Does your apartment have any shading devices?	Do you have Air-Conditioning?	Evaluate the following statement: Cross ventilation works well in my apartment and helps keep it cool.	Evaluate the following statement: My shading devices work well	Was Air-Conditioning installed after the apartment building was completed? (i.e. Is it retrofitted?)	Do you feel your apartment overheats?	What time of year does it overheat?
0-6 months	Own	1-6 years	3 Bedroom	6	West	No	No	Yes			No	Yes	Summer: December to February
0-6 months	Rent	1-6 years	1 Bedroom	4	West	No	No	Yes			Not Sure	Yes	Summer: December to February
0-6 months	Rent	1-6 years	1 Bedroom	3	West	No	Yes	Yes		Neither Disagree Nor Agree	No	No
