To whom it may concern

I am a home owner and part of the owner's cooperation in my complex of eight town houses

I have been speaking to fellow home owners in relation to rezoning in our area

Ordinarily this would be a cause for hope but for us it is a cause for alarm

We have seen plans to make our property a green space which will effectively make our homes worth a whole lot less than other properties in our street

There are so many green spaces in Ingleburn in fact there are at least three in walking distance from our street

There is even one green space in our street now

I strongly oppose these proposals and so to do the rest of our cooperation both now and in the future
