

DO NOT DISCLOSE MY PERSONAL DETAILS

I am the owner of the property at [REDACTED]. Having studied the proposed rezoning of the area and in particular a part of Eastbourne Community residential area, I am totally opposed to the rezoning proposal.

As the residential area is a relatively new only about 12-13 years old I do not want to be uprooted from the area. The proposed development of high rise developments will destroy the environment and the atmosphere that we are enjoying at the moment. With more residents it will add to traffic problems, parking, play area and recreation facility. I do not favour our area being turned into a ghetto and become a breeding ground for undesirables. Any proposed development as a result of rezoning will have the potential to increased crime and social problems. As is the Eastbourne has community facilities for the exclusive use of the residents what will happen to these facilities with an influx of hundred others moving into the area.

I am also strongly opposed to the proposed high rise development running parallel to Old Windsor Road from Memorial Avenue beside the new railway line. This development will be visible from our residence and will become an eyesore and greatly add to destroying the present green areas.

I hope my submission will be taken into account along with others before a decision is taken on the proposals.

Sincerely

[REDACTED]
