Submission on draft Central Coast Regional Plan - re. Proposed Warnervale Airport

Dear Sir / Madam

I am a resident of Wyee Point and I value the peace and quiet of my neighbourhood. I enjoy my lifestyle of coming home from work and on the weekends sitting outside with my family enjoying each other's company. If the airport was to go ahead, this would certainly no longer be possible as we are in the proposed flight path.

How does this enhance community lifestyles? I bet Wyong Council's Mayor, Doug Eaton lives nowhere near any of the proposed affected communities.

I am opposed to the inclusion of the Warnervale Airport in the Central Coast Regional Plan. A Regional Airport at Warnervale is incompatible with the Goals of the Regional Plan:

- **Goal 1: Enhance community lifestyles and accelerate housing supply.** An airport would destroy community lifestyles and make surrounding housing undesirable to live in. It may render some areas planned for urban release unsuitable, reducing housing supply. Proposed flight paths are over or adjacent to Wyee, Mountain Road Warnervale, Alison, Watanobbi, North Wyong, Wyong, Bruce Crescent, Warnervale and the new Town Centre.
- **Goal 2: Grow and diversify Regional Economy.** An airport at Warnervale will effectively contract the Regional Economy by sterilising valuable and unique industrial land, destroying 626 industrial jobs (SGS) and hampering economic diversity. Wyong Council said of the Warnervale Airport site in 2014, "This will become the employment hub that kick starts the Warnervale Employment Zone development estimated to create 6,000 jobs."
- **Goal 3: Sustain productive landscapes.** 900m of Warnervale Airport is to be located in Porters Creek Wetland which forms part of the drinking water catchment for the Central Coast. The presence of a large airport with an 1800m runway penetrating this pristine environment puts the water supply at serious risk of contamination.

- **Goal 4: Protect and manage the natural and cultural environment.** The airport site is surrounded by environmentally sensitive land. The 1,800m runway and safety runoff penetrates 900m into the SEPP 14 and E2 zoned Porters Creek Wetland.

I thank Planning NSW for removing the airport from the Draft Central Coast Regional Plan and request that there is NO AIRPORT in the final Central Coast Regional Plan.

This airport is not viable, not necessary and is contrary to all the goals stated in the Draft Plan.
