FW: Central Coast NSW environment

Dear sirs/madams,

No fabulous planning for our community on the central coast of NSW will be worth anything without consideration of every living thing that belongs here.

White people, indigenous people, every other colour of people and all the creatures who have to share our space HAVE to be considered.

Every tree that comes down KILLS creatures and ultimately us.

I will rile against any plan that politicians have for my country if all of these factors are not considered.

Progress is worth NOTHING if one possum dies to achieve it.

Please apply this rule to all development across NSW, not just the Central Coast.

We the people are sick and tired of shouting from what's left of the wilderness.

CAN YOU HEAR US????
