Dear Councillors,

I have been a member of the group developing the Narara Eco Village site at 25 Research Rd Narara for over a year now. Much of the land is forested but there are adequate cleared areas between the forest and flood plain to build a Village. We are aiming to have a Village of homes that are not only able to meet their requirements for water, sewage & electricity but also produce an abundance of fresh food. To succeed in actuality will require the blossoming of a vibrant and imaginative community both within and without the site. To succeed the test of time we will need to have the right infrastructure in place as well. The council can be a big part of this vision by enabling such communities as ours to flourish within its bounds. Our vision is to find a way of living well but sustainably in tomorrows world.

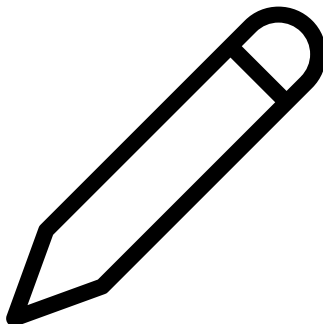

There are many individuals far and wide that would like to be apart of a community like ours and perhaps with a little inspiration from us may see a way to do it. So know when you're on as good thing, this is one of few ways we can socially move toward a future we can all live in.

Please do what you can to asist small communities focussed groups to grow. We have spend hundreds of thousands of dollars on consultants to meet fairly basic requirements ... it would be nice if this process were more accessible to young families without much capital.

Think Cohousing set ups (Chuck Durrett) rather than big developer outcomes. If more homes were arranged in this way it would save the council money in many areas, and nearly always develops a more integrated and socially engaged communities all without public expense.

It just requires the council to review rules that block these possibilities. These are benign developments.

Thank you and good luck!
