j To:

Thank you for the opportunity to make comments on the type of housing I would like to see provided on the Central Coast within the timeframe of 20 years as your promotional information specifies.

Smaller town house developments with only a maximum of eight town houses I think would fit into most of the suburbs surrounding and including Davistown, providing they are designed to be environmentally sympathetic and take into account appropriate drainage and preservation of the natural environment so that our ever diminishing fauna and flora is preserved. Taking into account most especially storm water run off so that nearby waters are not contaminated in any way whatsoever. Small town houses would be ideally suited to this area, preferably with views over Brisbane Waters & without huge areas of concrete. Of course adequate visitor parking should not be waived as existing streets are narrow carriage ways.

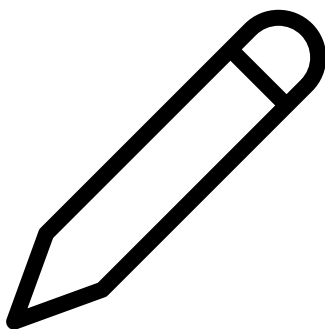

Many seniors I know do not want to live in high rise complexes, where noise pollution cannot be policed adequately. A site recently subject to an application by Woolworth's on Davistown Rd would be an ideal location for such a small development.

Saratoga heights and Mt Pleasant would also lend itself to this kind of small housing development.

Older people don't necessarily want to live in huge retirement homes. Many I speak to express the lack of housing of this kind that they seek.

Small group homes would also be perfect in current neighborhood environments. Anything larger is doomed to complaint and refusal by local councils spurred on by residents dissatisfaction with large complexes.

Thank you
