j To:

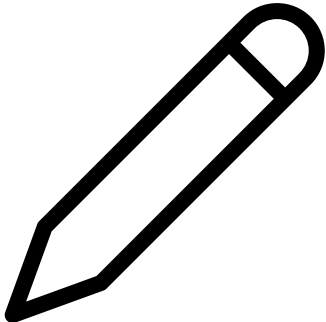

Burning of coal should be phased out. Plans for a fourth coal terminal in Newcastle should be scrapped as the world is moving away from coal to renewable energy. If we export coal we are only moving the source of pollution.

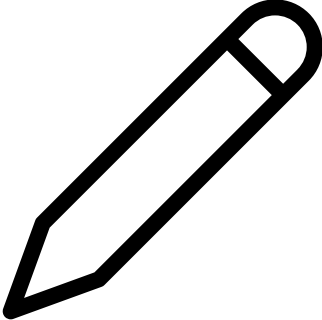

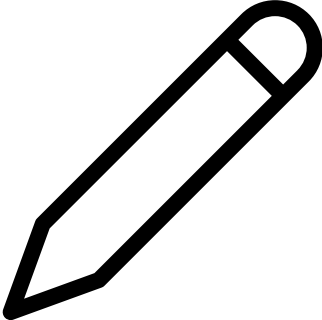

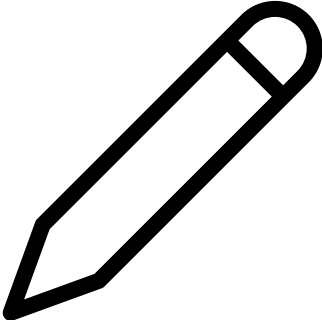

Furthermore, coal mining must be phased out in the Hunter valley, which must be protected and should only be used for agriculture, wine production, village life, thoroughbred industry etc. Our water catchments and rivers must be protected and new investment in water is essential
