There are thousands of potential jobs and business opportunities in developing renewable energy of all varieties. The Hunter region has many skilled people who could work in this area.

After the Paris agreement to limit climate change to 1.5 degrees, there should be a total moratorium on new or expanded fossil fuel projects and the industrial might of the Hunter could be brought to bear on the transition to 100% renewable energy.

The new industrial revolution is still waiting for Australia to grasp it's enormous potential, let the Hunter Region lead the way and help protect our future.

To:

We want a moratorium on all new fossil fuel developments and a plan for a just transition for the Hunter Valley.

We need to bring a halt to the damage being done to peoples health. our farms, forests and water systems. We need to rehabilitate the damage the mines have done, and provide for sustainable jobs and industry.

We need to transition Newcastle and the Hunter Valley into a manufacturing hub for Australian renewable energy, starting with NSW.

We must cease burning fossil fuels, to arrest the damage being done to our environment, health and infrastructure by climate change.
