

My suggestions for the future are:

- 1 Light rail and in time continuing around Newcastle, Bar Beach and Merewether Beaches
- 2 A Frank Gehry designed Art Gallery (see The Guggenheim in Bilbao, Spain) possible Venue the former State Dockyard site on the Dyke End.
- 3 Cruise ship terminal (see Auckland design)
- 4 Covered coal trains and stockpiles to reduce pollution
- 5 Promote tourism which is our future after coal.
7. An Administrator and Visionary for the city instead of our council who inhibit development. Also stop Newcastle Herald giving so much press and credence to "knockers".
7. Finally but a pipe dream, Maglev train to Sydney.
