9 To:

- Climate change is already changing our weather and all our lives. I want the Government to plan for sea-level rise, storm surges, changed rainfall patterns and provide for distributed energy, water and food systems so that our cities, suburbs and the bush are resilient to dramatic change.
- The coal industry is in structural decline. I want a moratorium on all new coal mines and a plan for a just transition for the Hunter Valley so that we can rehabilitate the damage the mines have done, and provide for sustainable jobs and industry.
- The Hunter Valley needs permanent and absolute protection for the wine industry, thoroughbred industry, water resources, good farmland and villages from coal mines.
- Scrap plans for a fourth coal loader terminal in Newcastle as it would be a financial disaster with the declining demand for coal throughout the world and the increasing use of clean energy. We also need to protect the world-renowned wetlands of Ash Island by adding them to the Hunter Wetlands National Park.
