a To:

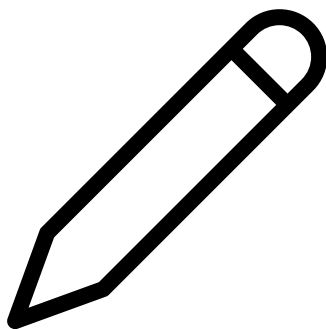

I am writing to request that the Department get real about coal and climate change in the Hunter, and help us make a quick and just transition to the global decline of coal and the reality of climate change.

Climate change is already changing our weather and all our lives. I would like the Government to plan for sea-level rise, storm surges, changed rainfall patterns and provide for distributed energy, water and food systems so that our cities, suburbs and the bush are resilient to dramatic change.

As the coal industry is in structural decline I ask that a moratorium be placed on all new coal mines and a plan for a just transition for the Hunter Valley be implemented so that we can rehabilitate the damage the mines have done, and provide for sustainable jobs and industry.

The Valley needs permanent and absolute protection for the wine industry, thoroughbred industry, water resources, good farmland and villages from coal mines so I would like to see

plans for a fourth coal terminal in Newcastle scrapped and protection for the world-renowned wetlands of Ash Island be implemented by adding them to the Hunter Wetlands National Park.
