t To:

The hunter regional plan is only concerned with the term of GOV not the term of the environment.  
DOES ANYBODY REALLY CARE IN GOV.?

There is a failure to provide adequate protection for the environment. The plan MUST OUTLINE clearly mechanisms for protecting areas of high environmental value.

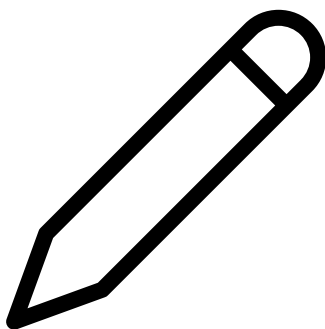

Too much reliance on biodiversity offsetting. If biodiversity is to occur then it must meet best practice principles like for like & NO NET LOSS of biodiversity. Highlight areas of endangered & threatened species. YOU CAN DO THAT CAN'T YOU.

No reliance on mine offsetting or private investment for Habitat connectivity.

The NSW government has a responsibility to the community to map areas that will be impacted BY CLIMATE CHANGE.

All water catchments should be protected against Coal seam Gas & mining.

If this plan relies on 11 councils to implement it then who will oversee everything, the NSW gov? You're not trusted now. Prove that clean air, clean water & a safe & enjoyable place to live is on the agenda, PROVE IT.
