I have lived in Maitland since 1952 and have seen the city grow to what it is today. I have been on Maitland Council for 25 years and seen the floods and events over these years.

I am worried that unless a Maitland Intercity Bypass is not built around Maitland then we will go backwards. The water that surrounds the city is happening more and more and will continue to happen more and more. Maitland needs to moved traffic in these times from one end of the city to the other with out blocking all access to the Central Maitland area. The current roads we have will not help Maitland at all.

We need a railway station in the Aberglasslyn area for our residents travelling every day to Newcastle and other places. Four lanes are required from the west of Maitland to Lochinvar to help the traffic congestion every morning and afternoon. The roundabouts go from one lane to two lanes then back to one lane.

The west residents are blocked in there streets and have major problems getting from home to the other side of the city and shopping centers.

The residents in the west of Maitland have major problems getting out of there suburbs.
