d To:

Main problem with Australian transport system:

1. People walking on footpaths feel safe with gutter separation from cars
2. Car drivers feel safe in there metal boxes even though they are just as safe as cyclists
3. Cyclists, and mobility scooter users do not feel safe with fast dangerous cars passing them too closely.

We will not be discriminated against anymore! Why do we have to live in fear by just trying to get from A to B. This is similar to slavery and living in fear and discrimination. Even when slavery was legal some good people were not for it and knew it was wrong. So today we are looking to good people to end the discrimination, fear, and injustice for cyclists and mobility scooter users.

OUR MISSION : For happy and healthy sustainable communities by promoting safe active transport culture (combine walk, cycling, bus, train with appropriate higher density infilling of cities to stop urban sprawl and car addiction). Focus on people, not on cars spewing out toxic exhaust emissions (asthma and cancer causing), creating danger, obesity (sedentary travel) and climate change chaos consumer culture. Safe, efficient, equitable, socially just transport for all (pedestrians, children, disabled, blind, wheelchaired, cyclists, 3 wheeled mobility electric/assist devices, motorists, etc.), not just the rich, greedy and selfish. Since the 90's car culture has stopped generations of kids that have lost their mobility of walking/cycling places. Save about \$14b p.a. in Australia on health costs due to inactivity. This money is needed for more doctors and police not more highways. (ref cycling promotion fund 2011)
