

Feedback for SOP Revised 2030 Plan

As parents and carers of children at Newington Public School, we are concerned that the educational infrastructure as part of Sydney Olympic Parks revised 2030 plan are only 'possibilities' and has no commitment from the Department of Education.

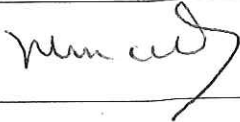

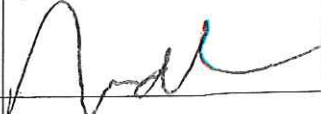

We are in need of primary and in particular secondary schools to cater for the current and proposed student population of this community. These schools need to be approved and budgeted now in line with approved and proposed residential development, to avoid the current predicament of placing pressure on existing local schools.
