Dear Sir,

We wish to express our dissatisfaction with your perceived approach to the condition of our beaches and the treatment being considered, based on a Worley Parsons study which was remotely prepared without consideration of the physical state of the beaches. You surely should spend your efforts on areas which are actually in danger such as Old Bar and Winda whopper.

Boomerang and Blueys beaches are actually among the most stable beaches on the East coast of NSW because of the headland structures and the constant accretion of sand from the south. I have been a resident at Boomerang Drive for 37 years and have seen all weather events over that time and every single time the beaches have fully recovered.

We wish to you to delete B and B from vulnerability area and amend draft SEPP clause 4(2) Sincerely Doug Hunter
