My submission is regarding the NBN towers. I recently received a letter in the mail to tell me an NBN tower was going near my property. I believe we need greater control over this process and it needs to be more transparent . We have a water board site nearby that is already used for a Telstra tower as well as water board issues and NBN advise they wont put the tower on that site because of lack of communication between government departments and state govt departments. I dont support a neighbour being paid to put the tower on his property and the tower is placed on another landholders boundary. I support a minimum distance of 500 metres to a residential dwelling. The tower should have to go before local government planning policies so all residents have the right to document their issues. The money paid to the landholder should also be transparent . A landholder has no right to devalue their neighbours property for financial gain. The site for this tower in my area is bottom of a hill near a gully and on a neighbours boundary a 45 metre visual eye sore. All new NBN infrastructure in rural/urban area should be underground.
