Please consider introducing legislation for a safe distance for NBN towers to at least 500 metres away from any homes. Our families health are being placed in severe jeopardy. Although NBN claim the omission meet guidelines, the truth is it is unknown just like abestos and tobacco was all those years ago. Now look at it. Our community is in favour of a faster more reliable internet service but not with towers. Especially since there are no guidelines as to the distance . Please consider amending the law, The further away the better.

Let's keep our communities safe.

Thank you for your time
